

ORGAN-MENTS

Let's combine learning with Christmas. Each student will create an ornament representing a different organ. We will then use the "Organ-ment" to decorate our "Anato-tree". Each student will make 2 organ-ments. Both of your ornaments can be the same organ, just make a different organ-ment for the second one.

Directions:

1. Each Organ-ment should be made out of cardboard or cardstock or an ornament (that you paint etc). They should be real pictures or depictions of the organ.
2. The organ-ment needs to be approximately 6x6 in size (no matter how big or small they really are in the human body).
3. The attached paper needs to be turned in with your organ-ment.
