## Initial Modeling Peer Feedback

1. What frames (matter, energy, forces) did your partner use to develop their model? How do you know?

2. Do you agree with the way your partner applied these frames? Where you agree, place a small check on your partner's model to indicate changes in matter (red ✓), transfer of energy (green ✓), or evidence of forces (purple ✓).

1.

3. How well does your partner's model explain how the microwave oven functions to heat liquid and food?

4. How well does your partner's model explain why the music was affected when a device was inside the microwave oven, especially when the speaker was farther away?

Use sticky notes to indicate the areas where you have questions, and write your specific questions on the sticky notes.
