

## Paper Cut Out Photography

Paper cut out combo photography is a combination of **forced perspective** photography fused together with art: paper cut out black cardboard.

**Rich McCor** is a London-based artist better known as @paperboy0, who creates art using paper cut-outs, his camera and interesting architecture.

**TASK:** Use the Papercut out template (on google classroom) or use your own individually designed paper cut out, to create a Paper cut out photograph.

**Step 1:** Draw a shape onto paper or print design from computer. Simple clip art images work best.

**Step 2:** Cut out shape using scissors.

**Step 3:** Holding the shape in one hand, use your camera/ mobile phone to capture photo.

Alternately watch the Rich McCor for steps on UTUBE
