

# Hero Logo Sticks

Kim Catalfamo: Adapted PE & Health

Skills: teamwork, fine motor skills, solving puzzles

Objectives:

Students are assigned color teams.

Students will roam playing area in search of the sticks of the team color .

Students will meet up with their co-team members to put their sticks together forming a picture of a superhero logo.

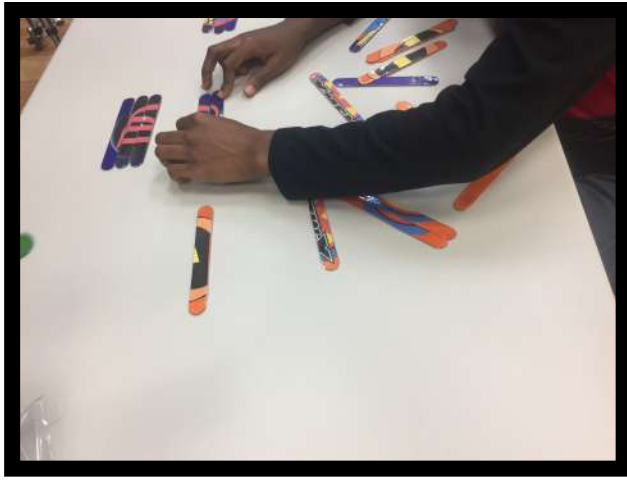

Adaptation: use pictures of superheroes wearing their logo; use pictures of the logo for them to have a reference

Other activities to use the sticks:

1-warm up cardiovascular run around circle of cones, with each lap student earns a stick. At end of exercise time, the students will gather to bring their sticks together with classmates to form logo puzzles.

2-use them as a tally for skills practiced. If they make a shot, get a stick, collect, create logo.

**To make the logo sticks:** use jumbo craft sticks of same color for each printed logo, making other logos another color. Place logo down on table, glue the logo to the sticks face up; cut between each stick. Number of sticks depends on the size of the logo. Wrap each logo piece on it's stick with clear packaging
