

## 4 Examples

Converted from PowerPoint/Slides into PDF. Ideas are limitless. I let each student run with their ideas, some love planning a wedding while others may focus on vehicles and a man cave.

After creating a few days, I showed tips on how to enhance photos using drop down arrow by crop tool to change image to shapes, the site [remove.bg](https://remove.bg) to take off backgrounds, adding borders, changing opacity, as well as, adding drop shadow/reflection. I prefer PowerPoint for more features. However, with it being a busy time of the year, I like that slides are easier for the majority to access. Enjoy!

## Nursing (pediatric)

## WHY A NURSE?

Ever since I was a little girl I always adored nurses. I just absolutely loved how hardworking and dedicated they were and their love to care for people. I also have major baby fever and absolutely love kids! I truly want to do something I love and nursing is definitely something that seems as a huge interest to me!

## WHAT IS A PEDIATRIC NURSE?

Responsible for providing care for children of all ages. Job duties often include assessing patients' conditions, recording patients' medical histories and symptoms, administering medicines and treatments, and performing diagnostic tests.

## FUN FACTS ABOUT NURSES!

- Nurses walk a 5k every shift
- Nursing is considered one of the most trustworthy and ethical professions in the United States
- Nursing is the largest healthcare profession

There's no way nursing is that difficult. Right?  
Wrong.

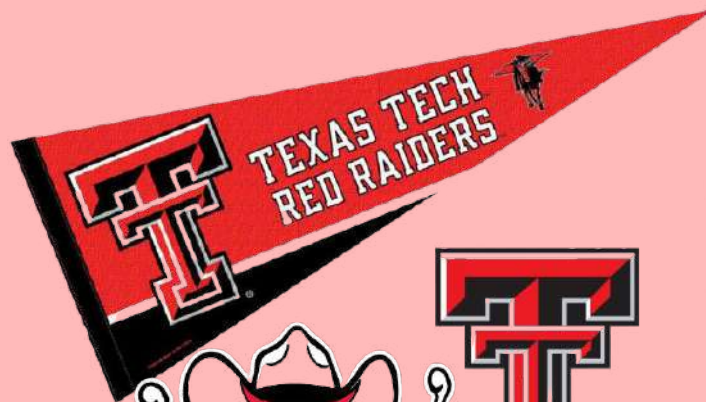

There's lots of learning, the exams are challenging, schedules are tricky, assignments constantly pile one on top of the other. All these have the potential of making your student life really hard.

Nursing is one of the hardest and most challenging majors in the United States and takes many years to complete.
