

Photo Challenge

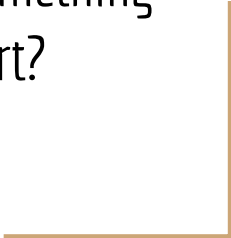

Make Paper Interesting

The challenge:

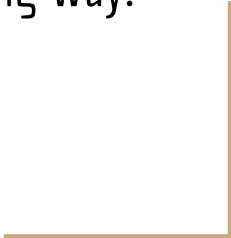

Photograph paper in
interesting, abstract ways.
How can you make something
so boring into art?

A thin, light brown L-shaped line that starts with a horizontal segment and then turns 90 degrees downward to a vertical segment.

Learning Target:

I can use the rules of
composition to photograph
paper in an interesting way.

A thin, light brown L-shaped line that starts with a vertical segment and then turns 90 degrees to the left to a horizontal segment.

Featured Artist: Francis Bruguière

(1879 - 1945)

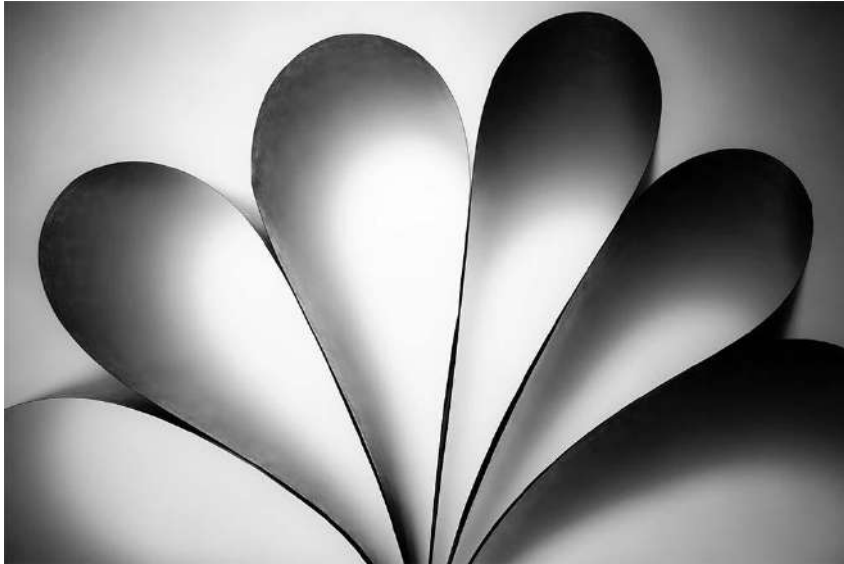

Bruguière created unnatural worlds in his pictures by photographing cut paper twisted into relief and lit by a single lamp placed in different positions. An exhibition of these abstract photographs was held at Der Sturm Gallery in Berlin in 1928 and attracted wide attention.

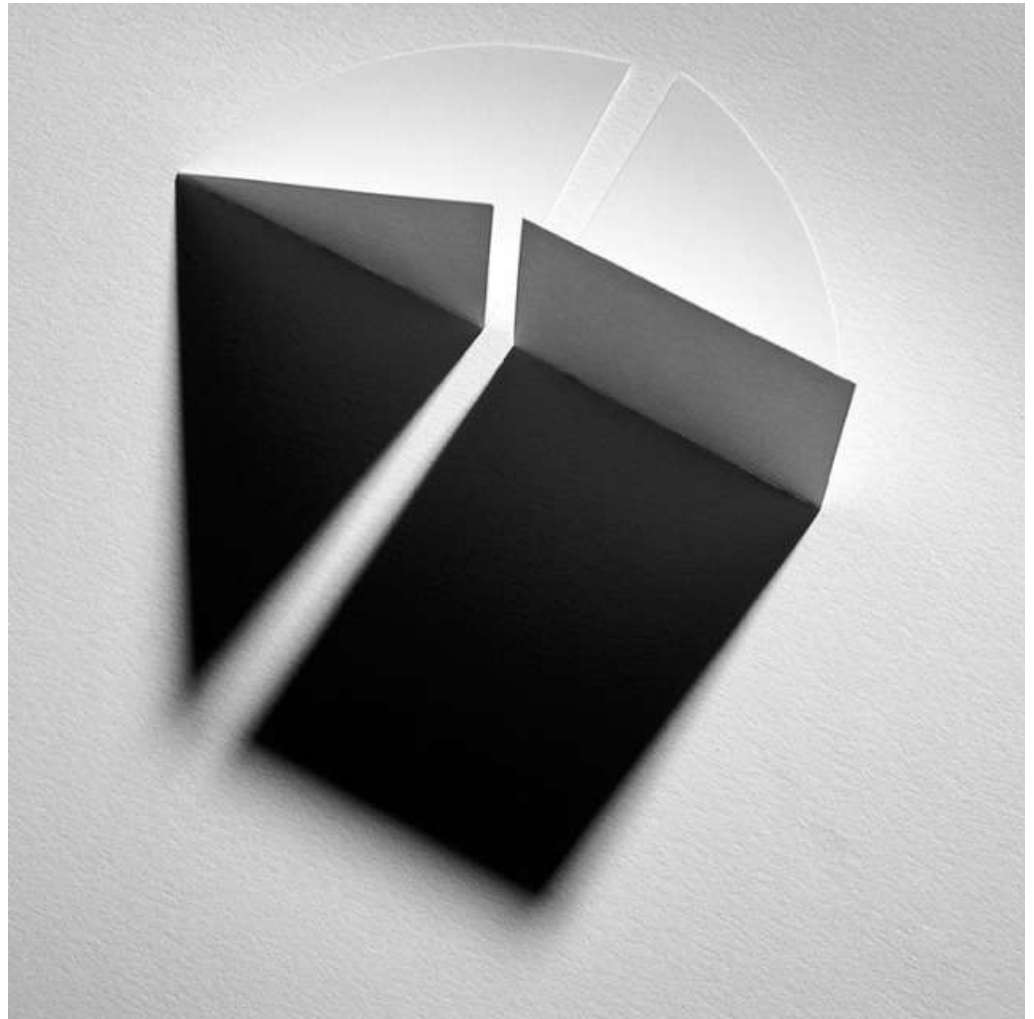

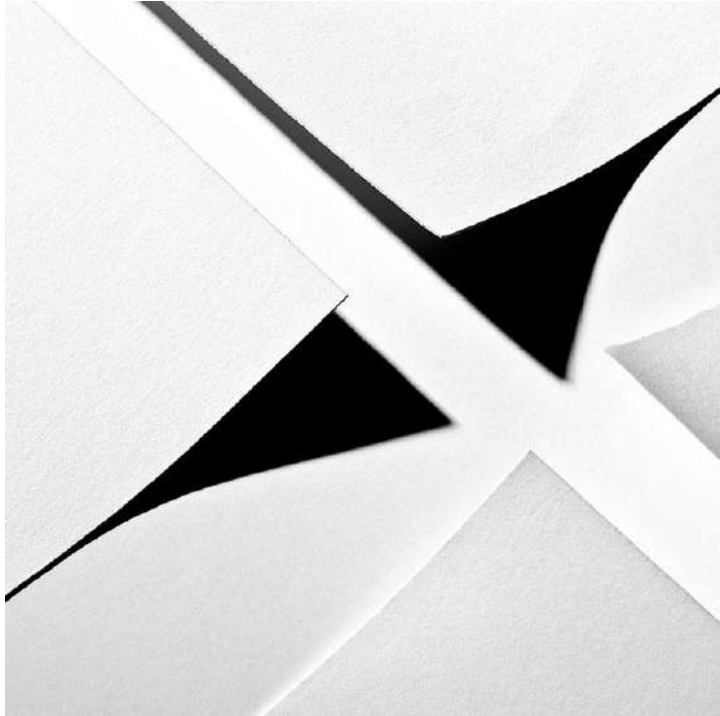

Abstraction

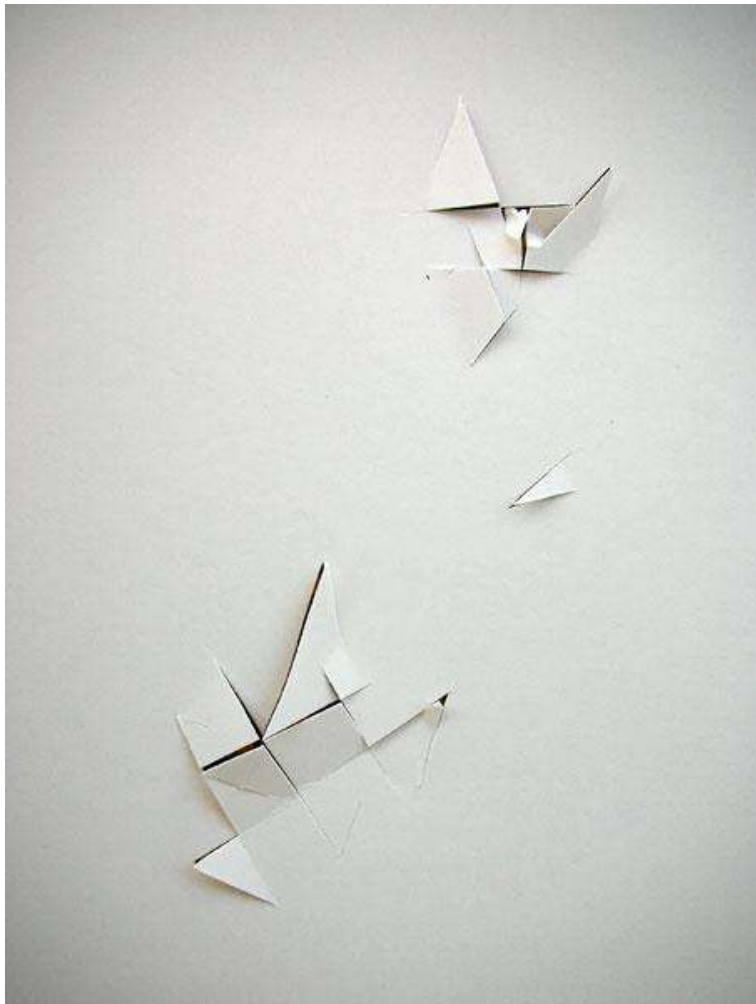

Shadow Shapes

Still Life

Texture

Directions:

Upload 5 different paper photos to Google Classroom. You will likely need to edit them in Photoshop to adjust exposure, remove reflected color and/or crop your images. You should aim to have an equal balance of light and dark in your photographs. Focus on composition and creativity. You can manipulate the paper in any way necessary.

Make sure you are taking more than 5 photos total: give yourself a wide range of images to choose from for your final selection. Remember, your first idea is not always your best idea.

Suggested Camera Settings

Set
Camera to
Aperture
Priority
("Av" on
the mode
dial)

Change F stop
depending on
desired depth
of field

Set ISO to auto

Remember that these are only *suggestions* based on certain conditions. You may need to adjust them depending on lighting, object size, depth of field, etc.
