

PHOTOPEA

Wooden Overlay

Mrs. Binstock

EXAMPLE

GET YOUR IMAGES

- ◆ Click [here](#) to download the barnwood image
- ◆ Find the image you want to “paint” onto the wood
 - ◆ It needs to be BIG (At least 700 X 500)
 - ◆ Needs to be PNG or have solid background
 - ◆ Save to folder OR copy image address

PREPARE IMAGES

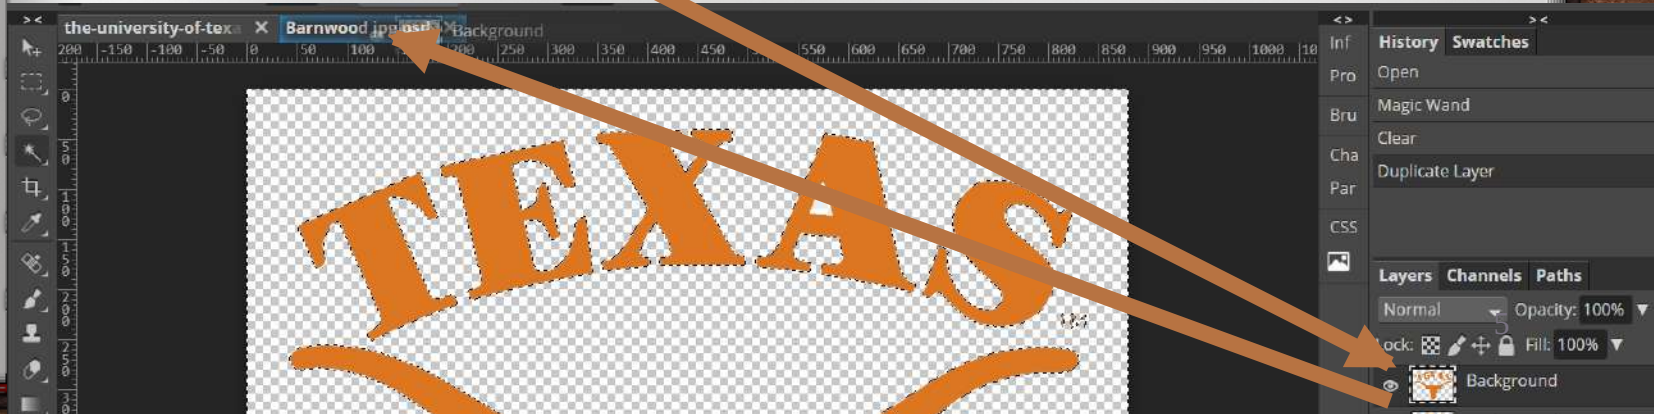

- ◆ PHOTOPEA: File – Open or Open from URL
- ◆ Open both of your images
- ◆ Make sure the emblem or image you want to put on wood has NO background (may need to use magic wand to remove it)

You may need to adjust TOLERANCE on magic wand
The magic wand tries to grab an area of “like” color
Tolerance is how “alike” the color it grabs will be
Higher tolerance = grabbing more of the image

ADD THE IMAGE LAYER TO BARNWOOD IMAGE

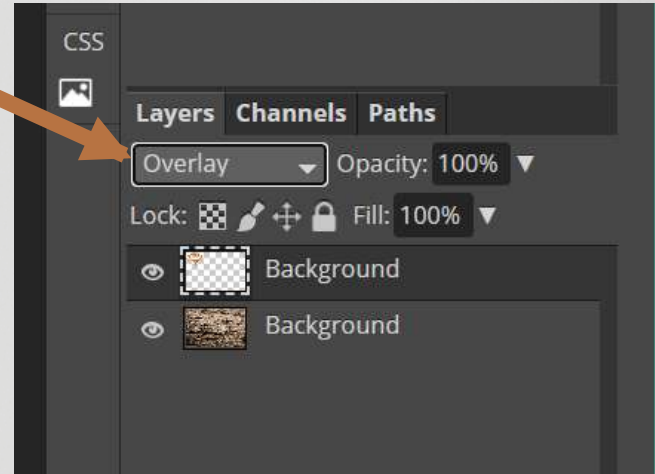

- ◆ Once the image has no background, drag the image layer to the wooden photo

Click and DRAG to the image's tab

ADJUST AND OVERLAY

- ◆ Change the **layer mode** to overlay

POSITION AND RESIZE

- ◆ Use FREE TRANSFORM (ALT+CTRL+T or Edit – Free Transform) to position and resize (HOLD SHIFT AND GRAB A CORNER TO AVOID SKEWING YOUR IMAGE!)

- ◆ Save (File – Export as PNG)
- ◆ Submit!
