

Name: _____ Date: _____

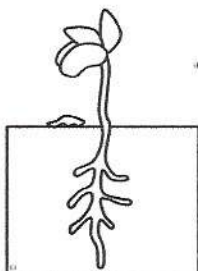

The Life Cycle of a Plant

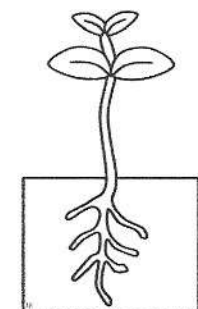

All plants are living. They have a life cycle. Plants start as a seed. The seed is planted in the ground.

Soon the seed begins to grow. Roots grow down into the soil. These roots will help get water for the plant.

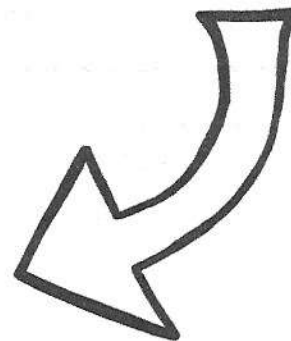

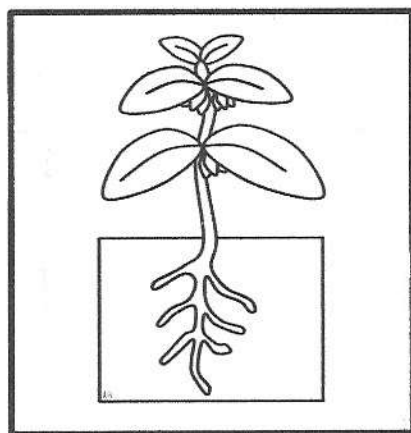

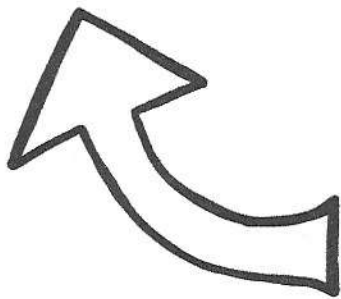

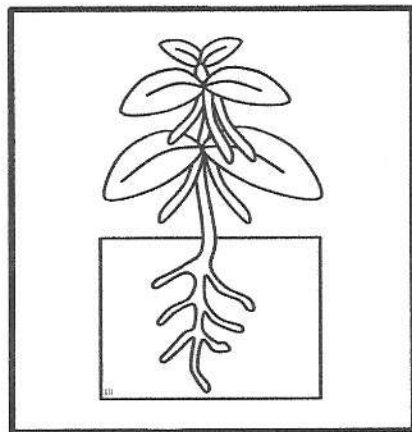

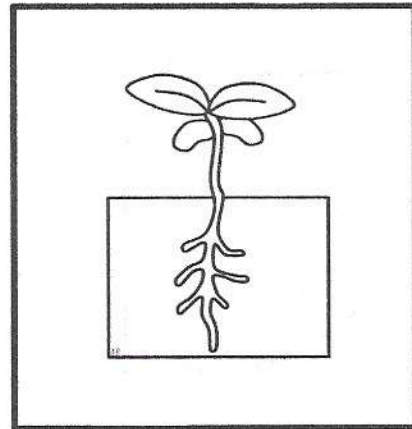

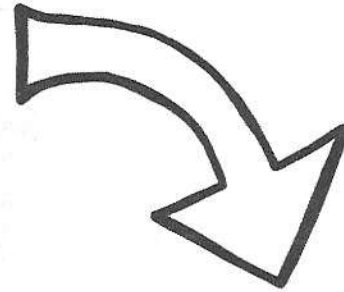

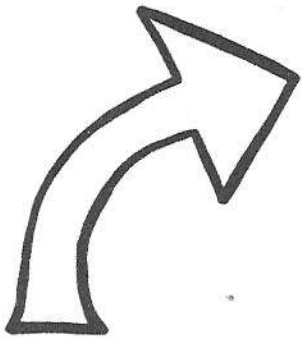

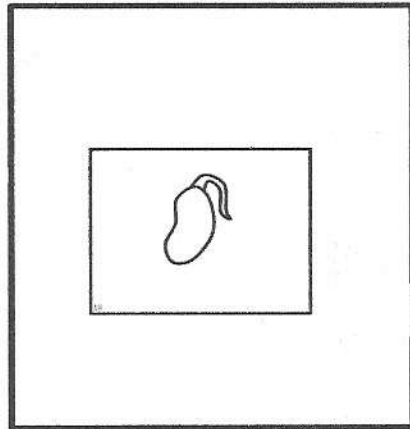

A seedling is a baby plant. It grows leaves. The leaves help the plant begin to make food from air and water. Soon it will grow into a bigger plant. Seeds from different plants will grow to be different adult plants.

An adult plant starts to form. It can grow flowers or fruits. New seeds are made. These seeds can then be spread and planted. The life cycle begins again.

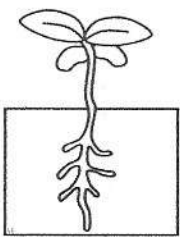

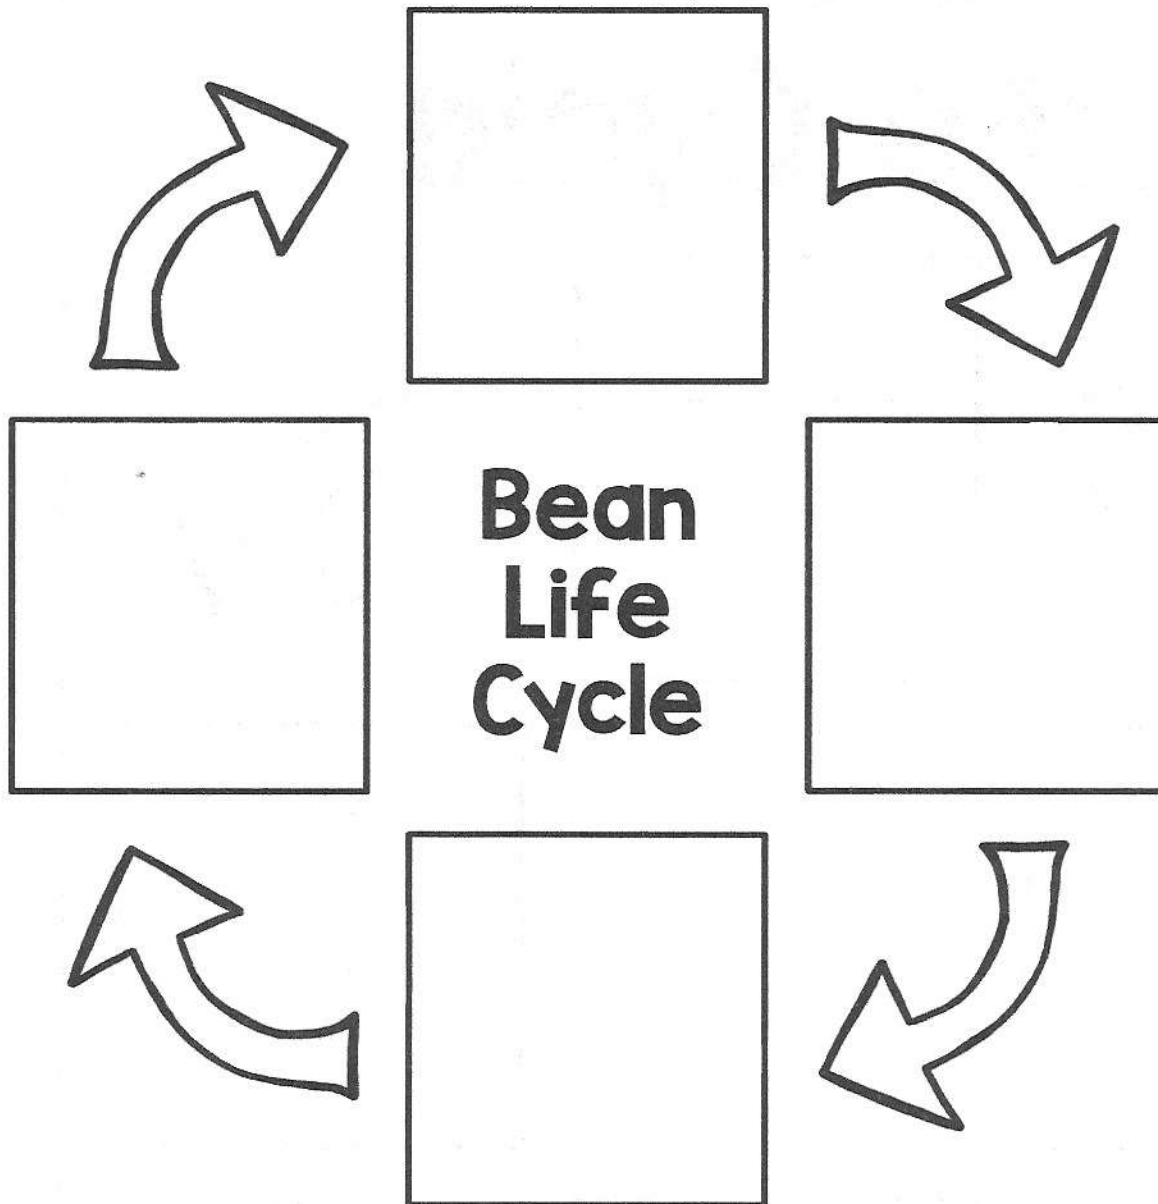

Plants are not alive.	TRUE	FALSE
Roots help the plant get sunlight.	TRUE	FALSE
Different kinds of seeds grow into different kinds of plants.	TRUE	FALSE
Seeds can come from fruits.	TRUE	FALSE
Adult plants make seeds, and the life cycle begins again.	TRUE	FALSE

Bean Life Cycle

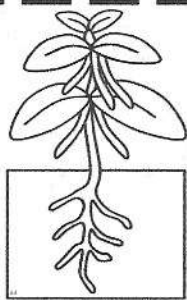

Name _____

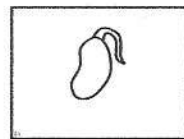

I can order the bean life cycle.

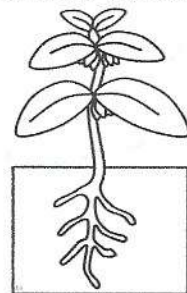

sprout

beans

seed

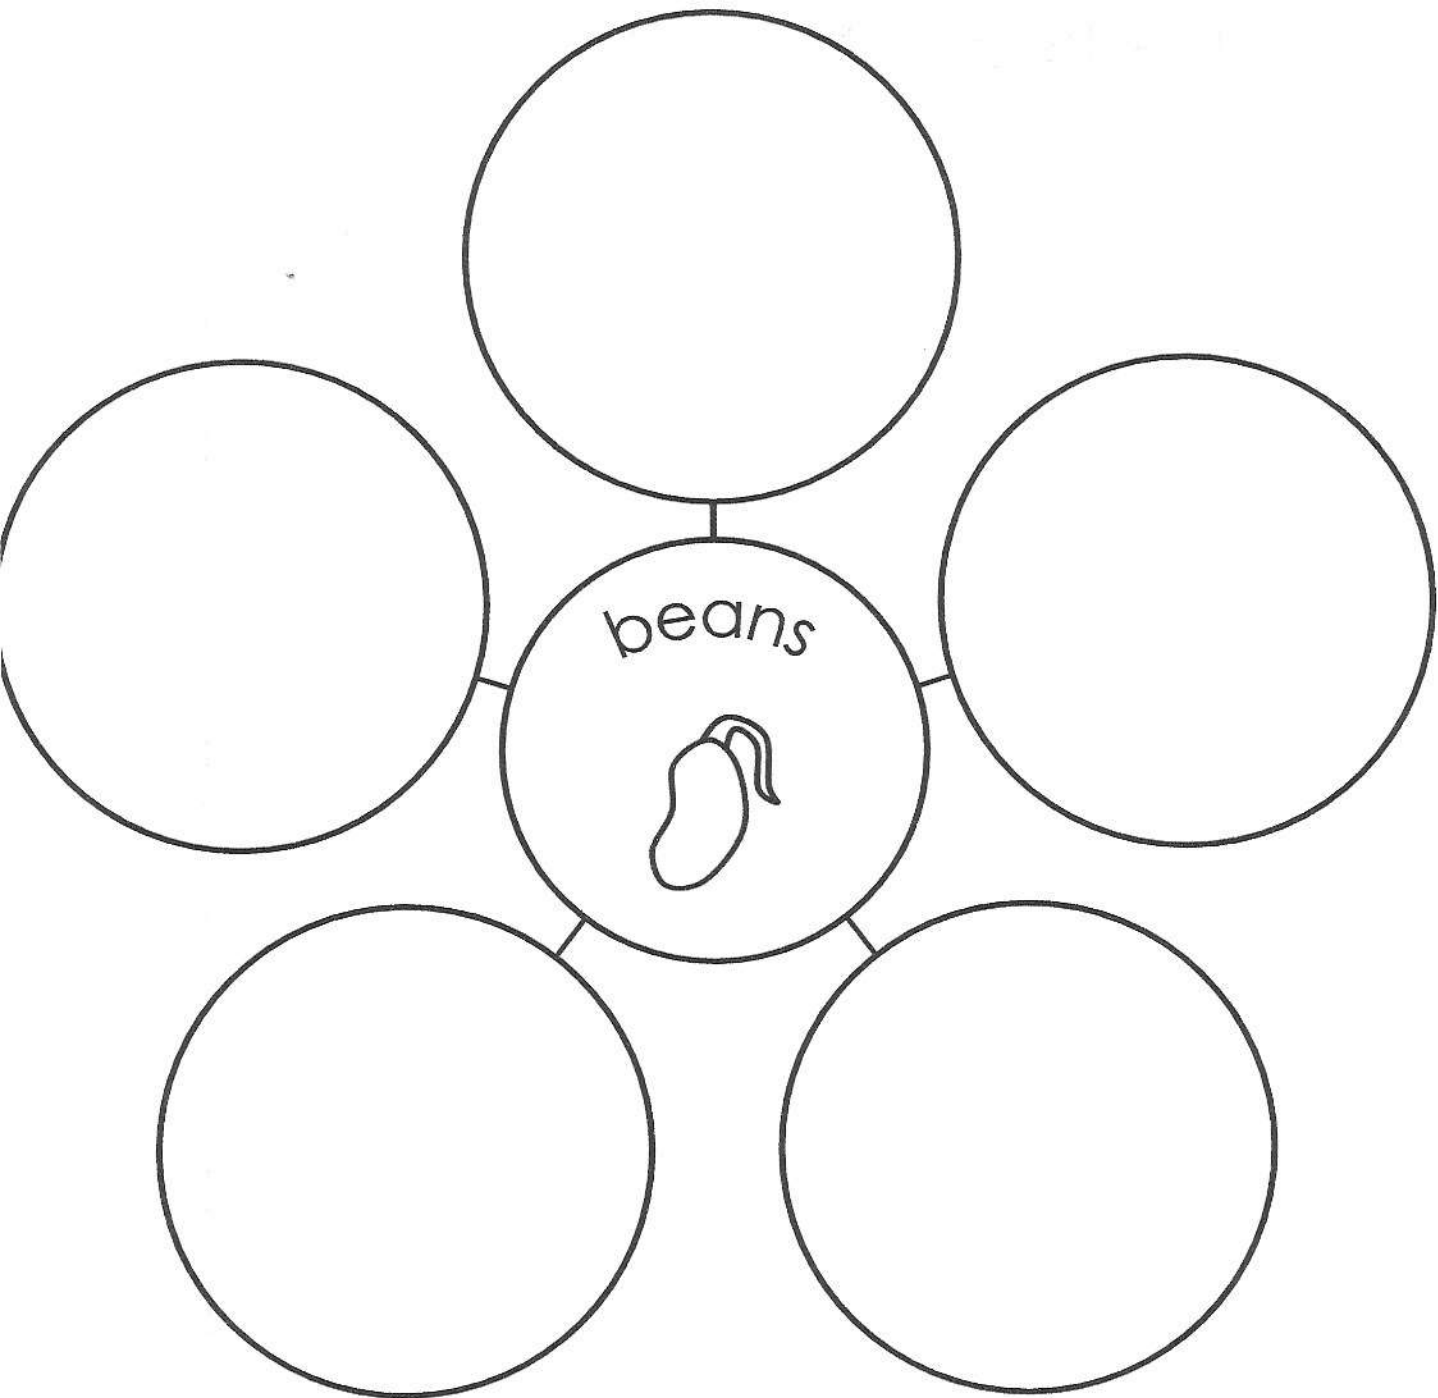

flowers

Name _____

What I Know

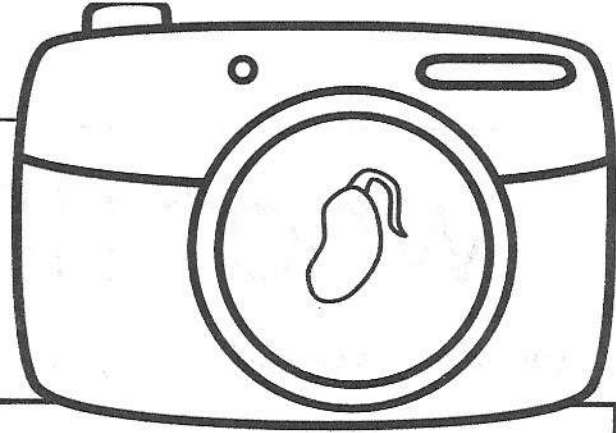

Tell what you already know in the circles.

Name _____

Visualize

Draw the life cycle.
