

Play Dough Activity-Body Directions and Planes

1. Choose your color of play dough can and plastic knife from the front table.
3. You have 5 minutes to create a stick-like figure, with a HEAD, TRUNK, ARMS, and LEGS using the play dough.
4. As the terms are discussed, you will place a toothpick into the designated area.
5. After all the directional terms are discussed, we will then cut the figure into the planes as they are called out.
6. Return play dough back to can and bring back to side bench along with the plastic knife.
