

What is Pyramid Model?

The Pyramid Model provides structure and tools so that each child can develop the social and emotional skills that they need to be successful in life.

This is an approach to teaching and supporting positive behavior and meeting the needs of ALL students.

This tiered approach in preschool focuses on building a safe and caring environment in which all students can learn.

Community Learning Center student's will be:

A Friend

Safe

Responsible

What can I do as a parent

to help support the Pyramid Model?

The success of our students relies on the connections between home and school. The preschool teachers, staff and administration would ask you to support the Pyramid Model at the CLC through the following:

Review the behavioral expectations outlined in this brochure through the school year.

- Use "Be a Friend", "Be Safe", and "Be Responsible" as part of your everyday language and behavioral expectations at home.
- Ask questions—we learn best with your support!
- If you have questions, contact your child's teacher for further support and resources.

The mission of the Austin Public Schools Pyramid Model is to ensure that sustainable, evidence-based practices are used to help young children in our community develop social-emotional skills that increase their likelihood for success across home, school and community settings.
