PORTRAITS – FACES & HANDS

You can treat these two subjects as separate themes to have fun with.

Faces:

What makes a compelling, powerful, emotional, soulful, and timeless portrait?

Try the style of Eric Kim, close up colourful portraits of your friends & family

Hands:

By only showing the hands of someone, you make them a mystery. Photos of hands are more open ended, because you wonder: Who do these hands belong to, and what is their life story?

Use the examples to inspire you.
