Practice Paper Balloon
Exploring value with color pencils
Elements of Art:
Shape (Geometric)
Color (Value: light to dark)
Space (Positive)

1. Use all Geometric Shapes to fill your space
2. Space is filled with shapes (positive shape)
3. No white of the paper (negative space)
4. Use a minimum of 3 different Geometric Shapes
5. Use overlapping
6. Each shape can have its own light source.
7. Shade each shape using color pencils to show a range of value for each shape
8. Check of your design and color with teacher before folding into your paper balloon
9. Fold into the paper balloon
10. Turn-in on the turn-in shelf for your period to be graded

Paper Balloon Folding Steps

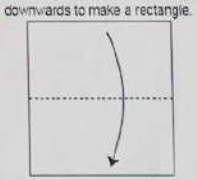
Let's Make Origami!

Balloon

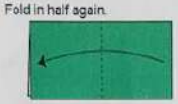
Level: Medium

HELP

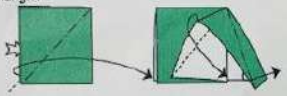
1 Fold the paper in half downwards to make a rectangle.



2 Fold in half again.

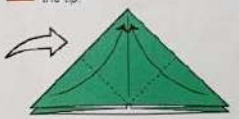


3 Open the front half of the paper, swinging the flap out and folding it down to create a triangle.

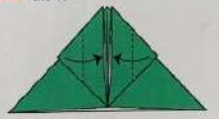


4 Flip over and repeat step **3** for the other side.

5 Fold the corners up to meet at the tip.



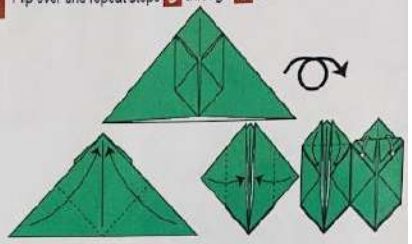
6 Fold the corners in to meet at the center.

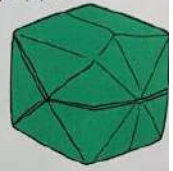


7 Now fold the top corners down to form small flaps.

8 Insert these flaps into the pockets you created in step **6**.

9 Flip over and repeat steps **5** through **8** for the other side.



10 Gently blow air into the small hole at the bottom of the figure.


11 Once it inflates, you should h your paper balloon!
