

Practice using test kits for Nature Park field trip

PRACTICE FIXING AND TITRATING FOR DO LAB

- Fill sample bottle from bucket

- Gently submerge entire bottle
- Try to mix water/air as little as possible
- Make sure there are no air bubbles in bottle
- Screw on cap **under water** before removing it

GOGGLES!

Follow directions in your test kit to fix water sample

- Follow directions in your test kit to titrate the sample

~~- Remove a 20 mL sample~~

- PRACTICE testing for Phosphate and Nitrate

- Fill test kit tubes from stock bottle
- Follow directions in your test kit

Use one tube for phosphate test and the other for nitrogen test
