

Precautions and Hazards REVIEW

Name _____ Class _____ Date _____ sh2011

Directions: Put a P for precaution and an H for a hazard on the line.

- _____ 1. You wore your goggles while heating a solution.
- _____ 2. You knew what to do, so you started working before the teacher said to begin.
- _____ 3. You plugged in the microscope even though you noticed the cord was torn.
- _____ 4. After you burned your hand, you told the teacher immediately.
- _____ 5. You rubbed your face while working with chemicals.
- _____ 6. You used tongs to handle a heated test tube.
- _____ 7. When you were unsure how to begin your experiment, you asked your teacher.
- _____ 8. You washed your hands thoroughly after completing your lab work.
- _____ 9. You immediately cleaned up the water you accidentally spilled on the floor.
- _____ 10. You removed your long necklace before working on your lab.
- _____ 11. You left the hot plate plugged in because you were going to use it later.
- _____ 12. You dried your hands thoroughly before plugging in the microscope.
- _____ 13. You carefully read all the directions before starting the experiment.
- _____ 14. To identify a chemical, you held it close to your nose and inhaled deeply.
- _____ 15. You unplugged the hot plate, but left the cord lying across the floor.
