

Newark Public Schools Information Services Division

Guidelines for the Procurement of Computer Equipment for Administrative & Instructional Use

The procurement of all computer equipment for both Administrative and Instructional (Student) use including PCs, Printers, Scanners, Smart Boards, and related accessories and supplies is subject to the approval of Information Services Division and must follow the guideline and equipment price list published by Information Services Division. Depending on the funding source and the type of equipment being purchased, some of the equipment can be acquired through Information Services Division while others must be obtained from the vendors directly. The price list attached to this document indicates whether ISD will supply the requested equipment or the equipment must be purchased directly from the vendor. For vendor supplied equipment, the purchase order is to be issued to the corresponding vendor in the usual manner. For equipment supplied by Information Services, one of the two methods of procurement outlined below is to be followed.

Method 1 – Budget Transfer (Departments/Administrative Offices):

This method involves a budget transfer and applies to departments/administrative offices and situations where the funding source used to acquire the equipment is from one of the following Account Code Funds: 11, 12, or 13. The amount of funds needed to cover the cost of the requested equipment must be transferred to the ISD Account Code: **10 11 000 252 600 304 000 000**. A standard budget transfer form must be used to accomplish the transfer. This document is in PeopleSoft and the process is carried out electronically within the system.

Method 2 – Purchase Requisition (Schools and other units with specific funds):

This method primarily applies to schools and situations where the funding source used to acquire the equipment is from one of the following Account Code Funds: 15 (WSR), 20 (Special Revenue), 50 (Food Services), or 53 (Regional Day). A Purchase Requisition is to be prepared with brief description of the equipment and the amount of funds needed to cover the cost of the equipment. **Newark Public Schools' Information Services Division is to be listed as the Vendor on the Requisition.**

Procurement of Non-standard Equipment:

Equipment listed on the attached price list is considered standard equipment, and all other equipment is considered non-standard. Deviation from the standard equipment list should only be considered when there is sufficient justification for doing so (e.g., specific feature(s) and/or functionality is required and not supported on the standard equipment), and must be discussed in advance with Information Services. Support for non-standard equipment must also be purchased at the time the equipment is purchased; this too should be discussed in advance with Information Services. Please note equipment procurements which deviate from the above will be rejected in the PeopleSoft approval workflow process.

Delivery and Installation:

For equipment ordered through Information Services using one of the two methods above, the delivery and installation will commence within three to five business days from the date that ISD receives the corresponding budget transfer or Purchase Order. All receiving departments or schools are to sign the proper paper work presented to them during the installation process. This will serve as the proof of delivery and installation and will allow ISD to close the corresponding ticket in the system.

For equipment ordered directly from the vendors, the delivery may vary depending on the vendor and the type of equipment ordered. Vendors will ship the equipment directly to the schools. Some equipment may not require any installation or configuration while others may need to be installed by the vendor or Information Services. For equipment such as laptops that require installation and configuration, schools and departments are to contact the ISD Customer Support and create a ticket for the installation. ISD technicians will be subsequently dispatched to the site to carry out the installation.

All Smart Board installations are carried out by the Facilities Management department. Therefore Schools/Departments are to directly contact the Facilities Department for such installations. Schools/Departments must ensure that the necessary cables and accessories required (outlined in the price list) for proper installation and operation of the Smart Boards are procured as part of the Smart Board purchase. The installers will not be able to install the Smart Boards without the required accessories.

Special Note:

Please note that certain accessories such as printer toners have been removed from the price list. These items and the corresponding prices are already in PeopleSoft and can be ordered directly from the system. All departments and schools are responsible for ordering their toners and must do so in advance and based on their needs. All toners ordered must be the original toners from the printer manufacturers. *Third party or compatible toners* **are not** to be ordered as such toners may void the manufacturer warranty on the targeted printers. All schools are requested to contact the Fixed Assets department and seek their assistance for tagging newly purchased items with appropriate district asset labels. Newly purchased items (regardless of the cost) must also be entered into the schools inventory system.

Please note that the items in the attached list have also been color coded in order to ease the selection process. The color coding has been done in the following manner.

-  Equipment intended for both Administrative and Instructional (Student) use
-  Equipment intended for Administrators and Administrative Offices only
-  Equipment ordered using ARRA, Title I, or SIG funds
-  Equipment intended for Instructional (Student) use only
