

# Apollo 13 – Project Management

Name \_\_\_\_\_

During the Apollo 13 trip to the moon and back, they encounter several problems. Identify at least 3 of the problems faced:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_

Pick one of these problems and identify how they solved it using the project management cycle.

**Initiate** (What was the problem? Why is this a problem? What is the preferred solution?):

---

---

---

---

**Plan** (What steps were taken to find the solution? What was recommended?): \_\_\_\_\_

---

---

---

**Execute** (What did they do?): \_\_\_\_\_

---

---

---

**Monitor & Control** (What was the result? Did it work as planned?): \_\_\_\_\_

---

---

---

**Close** (What is the next step? Did the problem go away or change?): \_\_\_\_\_

---

---

---
