

PSA and Poster project

The purpose of this project is to research a recent viral disease and create public service posters that can be used to inform the CHS community about the virus.

The virus you are studying is _____

The disease it causes is _____

The poster will actually be made **electronically** as a word document/Google Doc.

Each poster must have the following:

1. The name of the virus and the name of the disease it causes
2. The required information listed below
3. Some pictures or graphics
4. References (Do not use Wikipedia. You should use CDC or WHO websites. They must be reputable.) These can be in small writing at the bottom of the poster.

Citing sources:

Author "Name of the web page" date of publication, date you accessed the page
Http address

5. Correct grammar and spelling
6. Artistic qualities

Topics to cover on your PSA poster:

A. What is the disease and what causes it?

Description, viral shape, name of virus, where it came from, etc

B. How does it spread?

Incubation period, how long contagious, how long it "lives" on a surface, body fluids?
Airborne? Etc

C. How can I keep from getting it?

Prevention tactics etc

D. What are the symptoms?

Symptoms, age differences, statistics, pathogenicity, etc

E. What should I do if I get it?

Doctor recommendations, treatments, etc.

Turning it in:

You can turn in a paper copy to the tray in the room, e-mail it to me, or share it through Google
