Taryn Simon

1. What ideas/themes does the photographer explore through their work? (Make sure this is in your own words as I will be checking!!)
2. Describe the use of art elements and principles in two of their pieces.
3. What materials and techniques do they use to create their work?
4. What is your personal opinion of their work? Justify your response by explaining what it is you do/don't like about their work.
5. Compare the two different photographer's work, what is similar and what is different?

If you are struggling with describing the art elements and principles, look at the example annotation under resources.
