CANCER PREVENTION STUDY-3

Research today for a cancer-free tomorrow

The HHH Relay will offer the unique opportunity to participate first-hand in a landmark new study, the Cancer Prevention Study-3 (CPS-3). The American Cancer Society will be enrolling people into CPS-3, a long-term study that will help researchers better identify the lifestyle, environmental and genetic factors that cause or prevent cancer. Participants must be between the ages of 30 to 65 and have had no personal history of cancer. For more information about how to participate in the study or to be a volunteer to help on the day of Relay, please go the [Cancer Prevention Study-3 website](http://www.cancerpreventionstudy3.org) or contact Dr. Sheree Givre, CPS-3 Study Chairperson at sdgivre@aol.com.
