

# Paper Rollercoaster

TEST GRADE!!!

A zero can drop your average 15  
points (possibly failing!)

# Rubrics (What I'm grading)

- The structure is 10 points – if it falls over, DON'T start over! It's only 10 points. Just attach it to something and move on. You don't have time to rebuild it!
- Option 2 – Use cardstock for columns if they are weak and falling. – 10 points

# Rubrics (What I'm grading)

- Loop, Spiral, Funnel – 10 points each (30 points total)
- Each day, I'll build each of these with one of your partners.

# Rubrics (What I'm grading)

- The MOST Important thing is time!
- The marble must keep moving for 30 seconds! Each second is worth 2 points.
- If it runs for 15 seconds, that's a 70%.
- 20 seconds = 80%
- 25 seconds = 90%
- **SLOW** down the marble once it's gone through the loop and spiral.
- Ideas:
  - Several funnels
  - A U shape paper
  - Flaps in the track

Well built and Awesome!

Build Lots of Funnels
