

Rows of coins

You have 5 numbers:

1, 2, 5, 10, and 20

Put them in a row using these clues:

The total of the first 3 numbers is 27.

The total of the last 3 numbers is 31.

The last number is double the value of the first number.

Remember, your sequence only has 5 numbers.

Day 1: Row of Coins

You have 5 numbers: 1, 2, 5, 10, and 20

Put them in a row using these clues:

- The total of the first 3 numbers is 27.
- The total of the last 3 numbers is 31.
- The last number is double the value of the first number.

Remember, your
sequence only has
5
numbers.
