

SAMPLE PROJECT GUIDELINES

Google Classroom Header Design Project

Your task is to design a new image that I can use for my Google Classroom header image. This image must represent at least one of the concepts you have learned in this chapter, including, but not limited to:

- Workplace ethics
- Demonstrating social responsibility
- Celebrating diversity

Click the links in this document to access the banner image templates on [Google Slides](#) or [Google Drawings](#). These templates are sized appropriately for Google Classroom banner images. You can use either template to create your design.

Here is an example of something I have done. This was created using the Google Slides template:

Be sure to use text, shapes, and/or images in your header to complete your design. Your header image should be well designed and should not include an overwhelming amount of blank space. Remember, I should be able to see what you have learned through the banner image you design.
