

Scientific Notation Lesson

Simply put, Scientific Notation is a way of expressing numbers that are really big and really small without having to write out all the individual numbers and zeros.

$$1.23 \times 10^4$$

positive exponent =

negative exponent =

Convert from Sci Notation to Standard

$$1.23 \times 10^4$$

Convert from Sci Notation to Standard

$$5.743 \times 10^{-6}$$
