

Science Article Summary Outline

Article name:

Article Source:

Date of publication:

Author:

List three words that are necessary to know to understand this article:

1)

2)

3)

Give a definition for those words, based on the context and your understanding of the article

1)

2)

3)

What is the article about?

What is the main idea of each paragraph?

1st paragraph:

2nd paragraph:

3rd paragraph:

4th paragraph:

5th paragraph:

6th paragraph:

(Add more information if your article is longer than 6 paragraphs!)

Writing your abstract: (An abstract is a short, concise review of the material. If your abstract is as long as the original article, you've missed the point!)

Combine the information you have collected into 1 well-written paragraph to summarize the article.

Use at least two of your chosen vocabulary words correctly in your summary.

UNDERLINE the vocabulary words.

In an additional paragraph, give your evaluation of the article. Did you find it interesting? Why or why not? How is this information relevant to your life? If it is not relevant, why not?
