

Science Journal Entries

Science Journal Entry #1

Pick a scientist characteristic from the list below. Give an example of why that characteristic describes you and then explain why a scientist needs that characteristic. This should be a paragraph (4-5 complete sentences). Your writing should be clear and coherent.

1. Persistence
2. Curiosity
3. Self-motivation
4. Focus
5. Fascination with the beauty of nature
6. Imagination
7. Desire to improve
8. Confidence
9. Observant
10. Inquisitive

Science Journal Entry #2

Solving a Problem Using the Scientific Methods

- Devise a way to place a backpack, 3 textbooks, a notebook, pencils, and a lunch in a locker. Everything must be easily accessible and the lunch cannot be smashed. Draw the locker with the items.
- Design an experiment, record the information gathered, and prepare a report to communicate the results to the class.
- The report should describe how the group used scientific methods and should describe the steps followed.

Science Journal Entry #3

Animals That Help Plants

Animals need plants to live, but some plants benefit from animals, too. These plants produce seeds with tough seed coats. An animal's digestive system can wear down these seed coats and speed the growth of the seed. Write a paragraph explaining how animals help plants in seed dispersal. A concluding statement must be included.
