

# SCIENCE OF FLIGHT B - 521004

This first year course acquaints the students with the principles of propulsion systems, flight and navigation, atmosphere/weather, and the human limitations of flight. Students learn basic navigational skills, including map reading, course plotting, and the effects of wind. Leadership hours stress developing good, life-long decision-making skills and promote mental, emotional, and physical health. ROTC uniform and grooming standards apply. Graduation Credit: CTE
