

## Scope of Work: High School Art Room Water-Line

### Scope of Work

The high school art room water and sewer line needs to be moved from the east wall to the west wall and a new water-line tied into the water and sewer lines in the bathroom on the other side of the west wall. The district is seeking a design build project to meet current state building code standards.

Work should commence on the art room water and sewer lines as soon as possible after the contracts are signed.
