

POWERFUL PARTNERS

Parents and Guardians,

You are powerful partners in education and learning does not have to end in the classroom. How can you help at home? Here are some engaging activities that will support learning at home and help your child become more successful in their studies.

READING

Listening and Speaking

- Read to your kids. Choose a history section from their textbook or grab a novel they are reading in class. Give them the opportunity to listen to words.
- Have your child record themselves reading a children's book to share with a younger sibling or friend.
- Go on a walk and try to listen for sounds. You could even create a scavenger hunt of sounds for your children to listen for.

MATH

Apply and extend previous understandings of operations with fractions to add, subtract, multiply and divide rational numbers.

- Have your child explain to you what a fraction actually means and have them give you an example.
- Have your child add the following fractions: $\frac{2}{3} + \frac{4}{5}$ Ask them what the first step is in solving this problem (finding a common denominator)
- In the fraction above, the answer was an improper fraction. Have your child explain what that is and how they would turn that in to a mixed number.

HELPING YOUR CHILD LEARN AT HOME
