

Shadow Drawing

Inspired by the work of Vincent Bal - Shadowology

https://www.instagram.com/vincent_bal/?hl=en

Investigate the shadows of objects around you. Use your investigations to prepare for making Shadow Drawings.

How can you create interesting shapes and shadows?

How are the shadows of transparent, translucent, and solid objects different?

How does changing the position of an object change the shadow?

How does the time of day change shadows created by sunlight?

How do different sources of light affect the type of shadow?

Place an object on a piece of paper. Look at the shadow from many directions. Talk with others about some creative possibilities. Draw!

I can't wait to see your work!

If you are able to photograph your shadows drawings you can send them to me at:

You can also draw on a page like this one. Bring it to school to show everyone the next time we have art class!
