Dear Parent(s)/Guardian(s),

Hi, my name is Mrs. Nespor and I will be your child's math teacher for this school year. I have high expectations for all of my math students. The goal in math class is for everyone to be successful. This success requires all students to put forth their very best effort. I hope your child will leave my class with a positive experience and a greater understanding of mathematics.

To be successful in mathematics this year, it is important that your child comes to class prepared. Your child will need to purchase a binder, notebook paper and pencils. All assignments and notes will be kept in the binders and all assignments should be done in pencil. Your child's textbook is digital and the students will be given a login and password the first week of school. The students will have access to a TI – 73 calculator for class use only.

A copy of the course syllabus is attached. Please review this with your child and sign the information sheet included and return this sheet to school. Your child can have a successful year if we work together.

If you have any questions or concerns, please feel free to email me at the above address.

Sincerely,

Mrs. Michele Nespor
