Sensational Science Club

Before School 8:20 AM – 9:20 AM

For students in Grades 2nd through 5th

Welcome back science lovers! Sensational Science is back with **4 ALL NEW** fun and educational science clubs. During each club our young scientists will explore the world of science. They will perform hands-on experiments on the topics of chemistry, physics, life science, earth science, and problem solving. Best of all, not only will they leave with the knowledge of science; they will be able to bring home most of their creations. On top of that, they will not repeat a single experiment for the whole year!

SESSION 1

School is back in session. The Fall season is here. Join us for Sensational Science 1 as we perform some fun “fall” themed science experiments. During this club, our “scientists” will discover the world of chemistry and physics. Students will explore “creepy” chemical reactions, have a “blast” with air pressure, and discover how to create “spooky” sounds with science.

SESSION 2

Winter is here and it's cold outside, but the science club is heating up. During Sensational Science 2, students will continue to explore the world of science. Students will experiment with the power of magnetism and static electricity. They will discover how different materials react to heat. Additionally, they will use science to discover metal in places they would never expect it.
