Method Learning

Tom Ehlers

President and Founder

Tom graduated from Princeton University and completed Princeton's Teacher Preparation Program. Early on, he developed a passion for learning which led to the inception of Method Test Prep. Running this small business allowed Tom to really focus on each student's needs and spend countless hours tutoring with the belief that all students have the ability to succeed. In addition, he has worked as an educational consultant with school districts across the country and advises them on ways to improve the districts' college admission test scores.

Tom is a father to twins Jonathan and Julia and enjoys traveling with his children and wife, Ally. In his down time, he reads, watches sports, and stays active. His motto in life, "Keep your face to the sunshine and you will never see the shadows."

Should a student take
both the SAT and ACT?

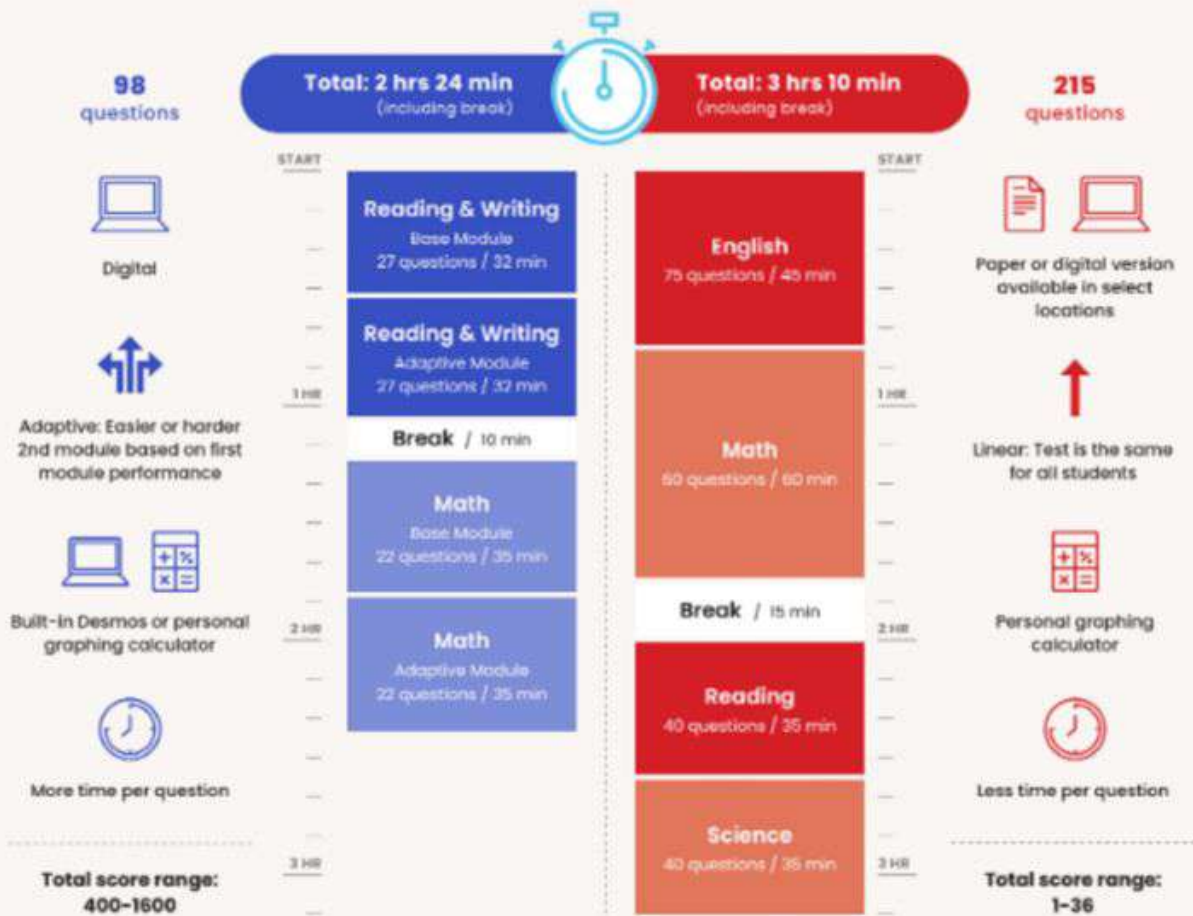

What are the
differences between
the SAT and ACT?

SAT HIGHLIGHTS

Shorter reading passages
More difficult text complexity, more vocabulary
Fewer math topics, but more in depth
Students use their own devices (tablets and computers)

ACT HIGHLIGHTS

Longer reading passages, less vocabulary
More straightforward but faster paced questions
Greater variety of math topics with simpler problem-solving
Emphasizes science reasoning and graphical literacy

Understanding Functions

Think of a function like you think of software: it takes an input (something you type in) and gives you an output (a result) according to a program. Typical notation gives the function a name like f , an input, and an output.

$$f(\underbrace{x}_{\text{input}}) = \underbrace{2x^2 + 5x}_{\text{output}}$$

Once the function is defined (just like f is defined above), anything that shows up in the "input" variable (here, that's x) gets plugged in whenever the variable shows up in the output. *No matter what the input is—a number or another variable—it gets plugged in.* Here are a few examples using the function above. Inputs are shown in blue.

$$f(4) = 2(4)^2 + 5(4)$$

$$f(4) = 52$$

$$f(a) = 2(a)^2 + 5(a)$$

$$f(a) = 2a^2 + 5a$$

$$f(p + q) = 2(p + q)^2 + 5(p + q)$$

$$f(p + q) = 2(p + q)(p + q) + 5p + 5q$$

$$f(p + q) = 2p^2 + 4pq + 2q^2 + 5p + 5q$$

Now, give the basic function question below a try.

QUESTION 1 OF 8

In the figure above, square ABCD is inscribed in a regular dodecagon (12 sides). Each side of the dodecagon has length 10. What is the area of the square?

(A) $200\sqrt{3} + 300$

(B) 700

Incorrect

(C) $200\sqrt{3} + 400$

Correct

(D) 900

[View Explanation](#)[Next Question](#)

An ice-cream truck driver's monthly profit can be modeled by the equation $p = 2k + m + 3n$, where p is the monthly profit in dollars, k is the number of ice-cream cones sold, m is the number of ice-cream sandwiches sold, and n is the number of ice pops sold. What is the ice-cream truck driver's monthly profit if he sells 200 ice-cream cones, 100 ice-cream sandwiches and 50 ice pops?

- A) 350
- B) 450
- C) 650
- D) 800

$$\begin{aligned} p &= 2(200) + 100 + 3(50) \\ &400 + 100 + 150 \\ &650 \end{aligned}$$

March and May SATs
What are the takeaways?

1. If students were routed into the more difficult second math section, it was much more difficult than the math on the Blue Book practice exams

2. On balance, students prefer the Digital SAT to the previous, paper SAT.
No surprise:

- Much shorter exam
- More time per question
- Much shorter reading passages

3. The SAT remains a very literal test:

- If an answer choice is not supported in the passage, eliminate the choice.
- If there is one word wrong in an answer choice, eliminate the choice.

4. Students who take the Digital SAT multiple times will have a large advantage:
- Less questions means each question is worth more. Just getting two more questions correct, could mean a 40-50 point increase

College admissions
today is more
competitive than ever
before

Strong test scores give
strong grades more
credibility

The less information an applicant gives, the more the college will scrutinize the information the applicant does give

A high score is better
than no score

Anything that a college says is optional,
(if you are serious about going to that
college), you do.

Students who submit strong test scores are offered more generous academic merit aid packages.

The SAT and ACT test students on skills they will need for success in college: reading comprehension, fundamental math and grammar concepts.

Institutions Requiring Standardized Test Scores

Despite COVID, several popular colleges and universities require test scores, including:

- ✓ All state-sponsored universities in Florida
- ✓ University of Georgia at Athens
- ✓ Georgia Institute of Technology
- ✓ Massachusetts Institute of Technology
- ✓ University of Tennessee at Knoxville
- ✓ United States Service Academies
 - Air Force Academy, Coast Guard Academy, Military Academy, Naval Academy

Students can and will be
successful on these exams with
the right preparation
