School Code of Conduct and Guidelines

To meet the challenges of the 21st century, our students must be critical thinkers, problem solvers, computer literate, and committed to school and community. To that end, we have established an educational plan which focuses on the creation of a school whose mission is to transform the teaching and learning of mathematics and science by developing ethical leaders. The future leaders will know the joy of discovering and forging connections within and among mathematics, science, the arts, and the humanities by means of exemplary laboratory environments characterized by research, innovative teaching and service.

The Academies at Science Park High School stress core courses that are needed to fulfill high school requirements, as well as electives which are needed for career pathways. After taking courses from these two areas, students will have a strong foundation for entrance into college. This approach will ultimately support specific career goals.

SPHS

Leadership Council's Mission Statement

The SPHS Leadership Council aims to foster and maintain a culture of respect, responsibility, pride, and communication among and between all stakeholders, and to uphold an environment that is safe, orderly, and well functioning. We aspire to cultivate a collaborative and supportive spirit in which all members of the Science Park community can work to achieve the academic standards.
