

Spring 2023 Assessment Data

September 21, 2023

Yvonne Dixon - Director of 9-12 Instruction

Lisa Eldredge - Assistant Superintendent of Teaching and Learning Services

Darin Holley - Director of K-8 Instruction

Elizabeth Kutchev - Director of Instructional Technology, Data and Assessment

About Spring Assessment Data...

- State assessments are summative assessments designed to be a snapshot in time of student performance.
- State assessments are one part in a balanced assessment system that uses multiple and varied assessments to provide all users with information they need to support teaching & learning.
- State assessments help policy makers and decision makers understand overall levels of achievement & identify schools/groups/students for support.
- State assessments are not designed to be diagnostic or drive day-to-day teaching & learning.

About Spring Assessment Data...

- **Spring 2020:** No state assessments administered
- **Spring 2021:** Participation was not required
- **Spring 2022:** State assessments required
- **Spring 2023:** State assessments required

Increase from 2021-2022

Science - Percent At or Above Proficiency

Social Studies - Percent At or Above Proficiency

Summary

- At the elementary level the majority of our schools demonstrated growth in both ELA and Math.
- Many of our schools at multiple grade levels, met or exceeded the state scores in both ELA and Math.
- Overall our Science and Socials Studies scores showed growth from the previous year.
- As we discussed last year, these scores mirror last year's NWEA for middle school.
- We are seeing solid results in ELA and Math at the elementary level due to our investments in those areas. We are confident we will see similar results as we implement new programs at the middle school level.

Increase from 2021-2022

Summary

- Both middle schools showed growth on the ELA PSAT as compared to last year and proficiency moved closer to the State score.
- Middle school math scores showed less growth. With the implementation of the new math materials, we are confident they will begin to increase.
- Subgroups scores in ELA showed growth throughout the grades. Our new ELA program includes specific supports for intervention with subgroups which are proving to be effective.
- Durant and Kettering High Schools grew in both Math and ELA.
- Beginning with the 2023-2024 school year our new ELA curriculum will be fully implemented at high school along with our new Math programs for many of our classes. We anticipate they will also have an impact on student achievement in the near future.
