

Energy “I Can” Statements

Physical Science Learning Target #1:

I can...investigate how matter changes forms but the total amount of matter stays the same.

Physical Science Learning Target #2:

I can . . . describe how an object can have potential energy because of its chemical make-up and can have kinetic energy because of its motion.

Physical Science Learning Target #3:

I can . . .identify how electrical, chemical, thermal nuclear, radiant, and acoustic energy change form.

Physical Science Learning Target #4:

I can . . . explain how matter can change form but total amount is same.

Physical Science Learning Target #5:

I can . . . trace how energy changes from one form to another.

Energy Transformations
