Strokes

Back and forth strokes

Circle strokes

Vocabulary

Analogous colors are very close to each other in hue. They are usually used to make something seem beautiful or harmonious. You can create an analogous color scheme by choosing 3-4 colors next to each other on the color wheel.

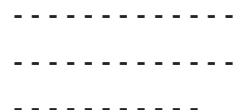

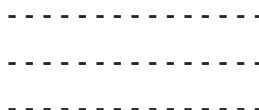

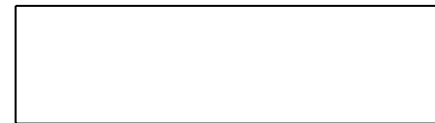

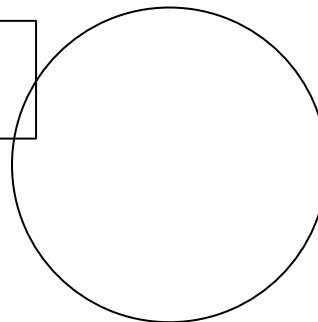

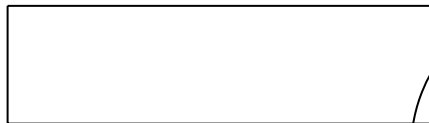

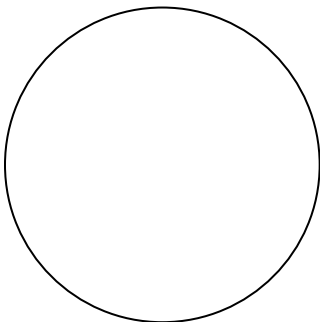

Burnishing involves drawing with very heavy pressure. When you burnish, you push the pencil against the paper as hard as you can. The purpose is to put so much pressure on the color layers already on the paper that you “grind” them together and also grind them into the tooth of the paper until no paper shows through. The resulting color is brighter and richer.

Two Ways to Blend Colored Pencils

- Look at the color wheel and select 3 analogous colors to practice the blending techniques in the rectangle.
- In the circles draw and color an emoji to practice the techniques

Layering

White pencil
