Science & Technology Integration

Things you can use now

Things you can use later

Things to consider for the future

Teacher Productivity

Student Productivity

Many of the practices can be used across disciplines

Simple

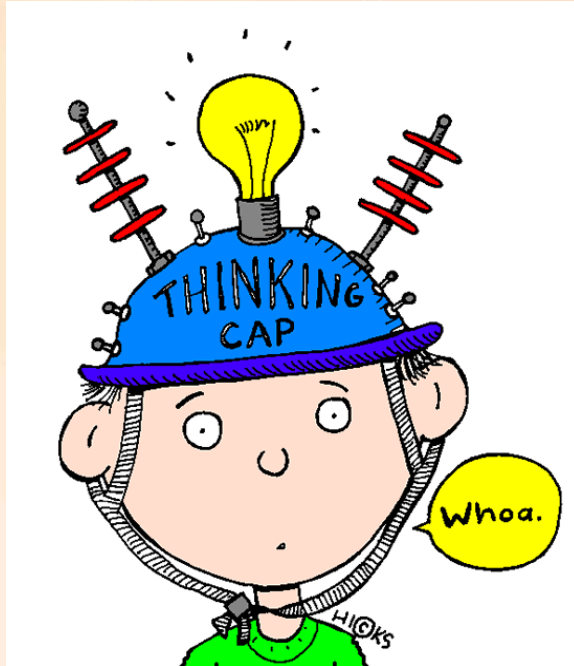

Challenging
More Planning

Think before we jump into Technology

Consider **Why?**

Consider our **Students**

10100101010011110100001001011101001011010101011101000010001010011001

**Our students have changed
radically**

**Students are no longer the people
our educational system was
designed to teach**

101001010100111101000010010111101001011010101011101000010001010011001

Today's students represent the first generation to grow up with this new technology

1010010101001111010000100101110100101101010101110100001011010001001

They have spent their entire lives surrounded by and using

- **Computers**
- **Videogames**
- **Digital music players**
- **Web cams**
- **Cell phones**
- **And all the other toys of the digital age**

1010010101001111010000100101110100101101010101101000010001010011001

College grads have spent less than 5,000 hours reading

But over 10,000 hours playing video games (not to mention 20,000 hours watching TV).

Computer games, email, the Internet, cell phones and instant messaging are integral parts of their lives.

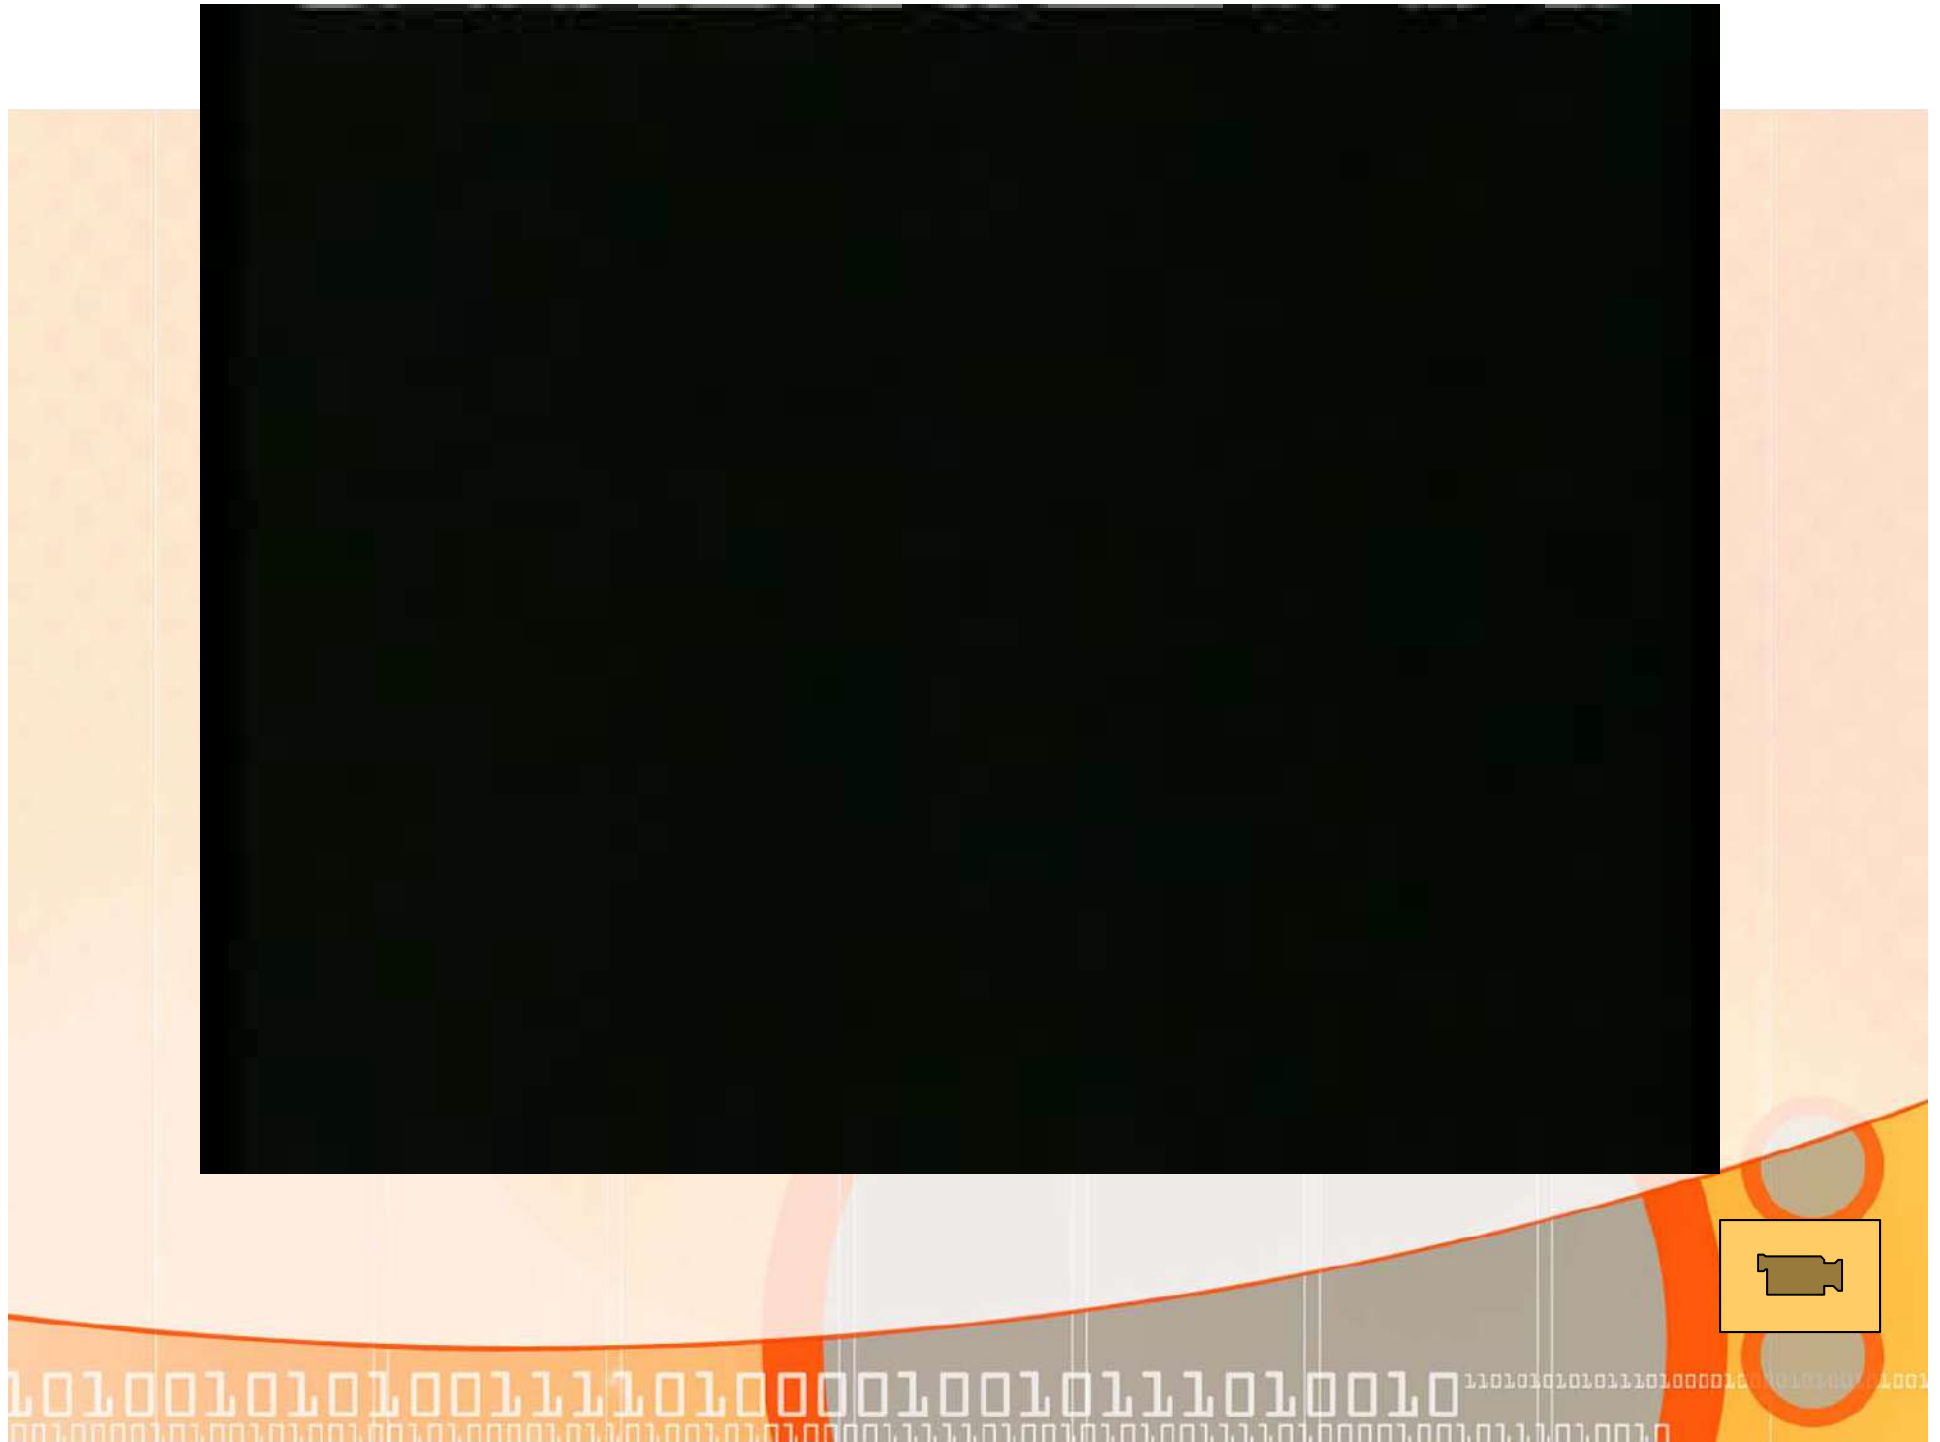

101001010100111101000010010111010010110101010101101000010101010011001

As a result, students think and process information much differently

10100101010011110100001001011101001011010101011101000010001010011001

A decorative graphic at the bottom of the page. It features a horizontal band of binary code (0s and 1s) in white and orange. On the right side, there is a large, stylized orange number '9' that overlaps the binary code.

Wordle

The background of the slide is a light orange color with vertical stripes of varying shades of orange and yellow. A large, semi-transparent grey semi-circle is positioned in the lower half of the image. At the bottom, there is a horizontal band of binary code (0s and 1s) in a light orange color. On the right side, there are two orange circles, one above the other, and a red curved line that starts from the bottom left and curves upwards towards the right.

Wordle (*Word Clouds*)

- A tool for generating “word clouds” from text that you provide
- The clouds give greater prominence to words that appear more frequently in the source text
- You can tweak your clouds with different fonts, layouts, and color schemes
- The images you create with Wordle are yours to use
- You can print them out, or save them to the Wordle gallery to share with your friends

ENERGY

KINETIC

Kinetic energy is motion -
the motion of waves, electrons,
atoms, molecules and substances

Chemical energy is the energy stored in
the bonds of atoms and molecules.
Biomass, petroleum, natural gas, propane
and coal are examples of stored chemical
energy.

Nuclear energy is the energy stored in
the nucleus of an atom - the energy that
holds the nucleus together. The nucleus
of a uranium atom is an example of
nuclear energy.

Stored mechanical energy is energy stored
in objects by the application of a force.
Compressed springs and stretched rubber
bands are examples of stored mechanical
energy.

Introducing Skype in the classroom

Skype in the classroom is a free community to help teachers everywhere use Skype to help their students learn. It's a place for teachers to connect with each other, find partner classes and share inspiration. This is a global initiative that was created in response to the growing number of teachers using Skype in their classrooms. [Read more](#)

Web 2.0

Term describing the World Wide Web and web sites that aim to enhance creativity, information sharing and collaboration

**Blogs
Video Sharing
Social Media
Wikis....**

Blogs

The background is a warm-toned abstract design. It features a large, light grey semi-circle in the lower half, partially overlaid by a red curved line. To the right, there are two orange circles. The bottom edge is decorated with a horizontal band of binary code (0s and 1s) in white and orange.

Blogs

- The term **blog** is short for **web log**.
- A shared on-line journal where people can post entries about personal experiences, hobbies or respond to posted statements
- Postings on a blog are usually in chronological order

How to Create a Blog

Control Who Leaves Comments

The screenshot shows the Blogger 'VES News' Comments Settings page in Windows Internet Explorer. The browser window title is 'Blogger: VES News - Comments Settings - Windows Internet Explorer'. The address bar shows the URL: <http://www.blogger.com/blogoptionscomments.g?blogID=2769061788745204999>. The page features a navigation bar with tabs for Posting, Comments, Settings (selected), Design, Monetize, and Stats. Below this is a sub-navigation bar with links for Basic, Publishing, Formatting, Comments (selected), Archiving, Site Feed, Email & Mobile, OpenID, and Permissions. The main content area is titled 'Comments' and includes the following settings:

- Comments:** Radio buttons for 'Show' (selected) and 'Hide'. A note states: 'Note: Selecting "Hide" does not delete existing comments - You can show them at any time by re-selecting "Show".'
- Who Can Comment?:** Radio buttons for 'Anyone - includes Anonymous Users' (selected), 'Registered Users - includes OpenID', 'Users with Google Accounts', and 'Only members of this blog'.
- Comment Form Placement:** Radio buttons for 'Full page', 'Pop-up window', and 'Embedded below post' (selected). A note states: 'The embedded comment form can not be used if you have Post Pages disabled.'
- Comments Default for Posts:** A dropdown menu set to 'New Posts Have Comments'.
- Backlinks:** Radio buttons for 'Show' (selected) and 'Hide'.

The bottom of the browser window shows the 'Done' status bar and the 'Internet' icon. The page has a decorative footer with a binary code pattern and a large orange circle graphic.

Students
National & State Standards

Wikis

Allows users to collaboratively create, edit, link, and organize the content of a web site

Usually for reference material

Teachers regularly use wikis for group projects

Is it reliable?

WIKIPEDIA
The Free Encyclopedia

Wiki vs. Blog

- **A Wiki is similar to a blog**
- **The difference is the ability for students to interact with information**
- **Blogs tend to be one way communication between the teacher and students**
- **Wikis are designed to be collaborative**
- **Places for students to share and work in cooperative groups**

More About Wikis...

- **Students can complete projects and assignments in groups or individually**
- **Student can contribute as long as they have Internet access**
- **Individual assignments or projects can be added to Wiki space**

More About Wikis...

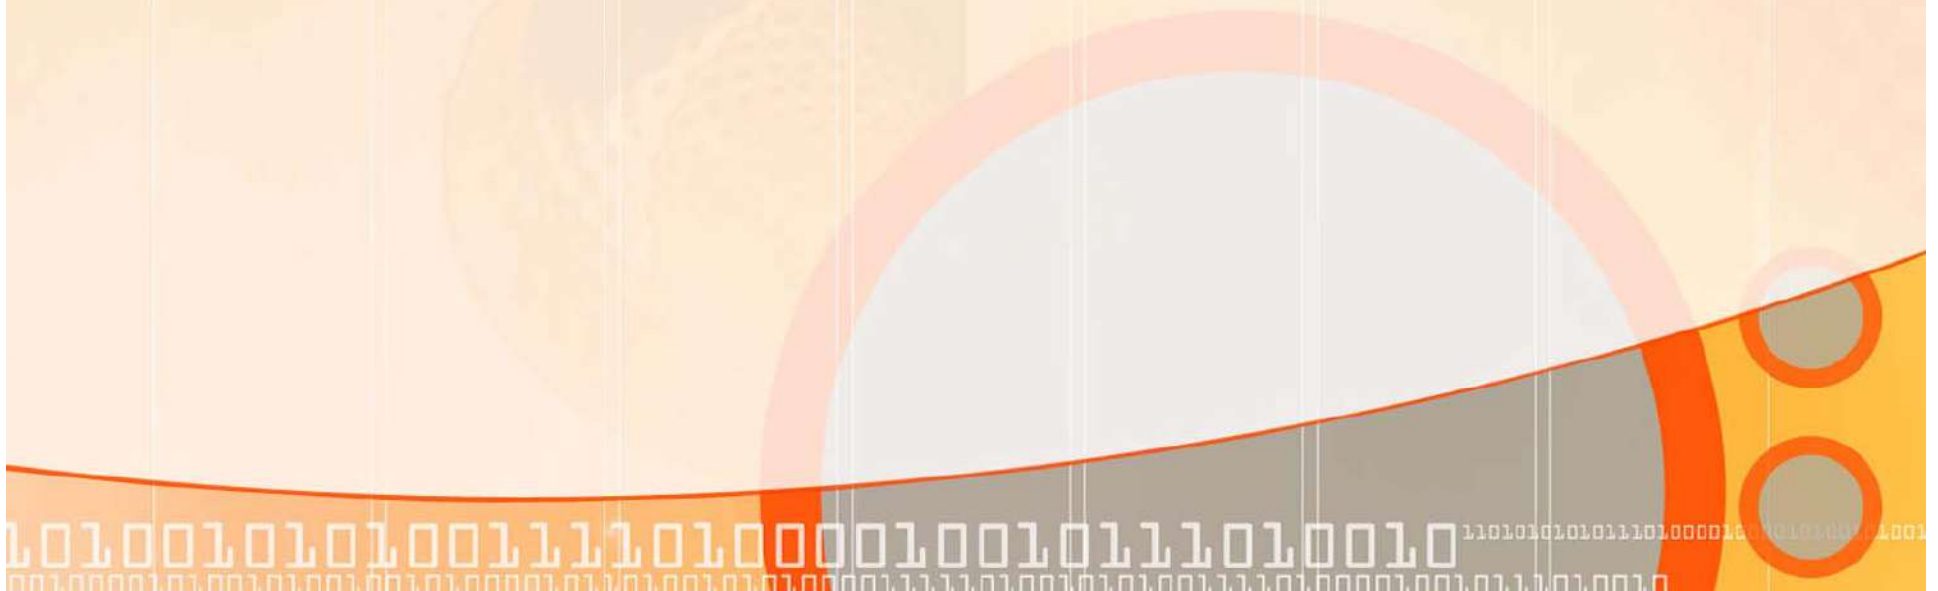

- **Wikis are more than a place for writing**
 - **Ideal for lessons, images, videos, etc.**
- **Allows teachers and students or students and students to collaborate in a dynamic process**
- **Teachers can collaborate with other teachers in thematic units, class projects, research, curriculum....**

Wikis in Plain English

Wikis Ideas

- **Problem Solving – students can write about and provide images of where they applied math to solve a problem**
- **Students work in groups to solve challenging word problems**
- **Solve problems of the week**

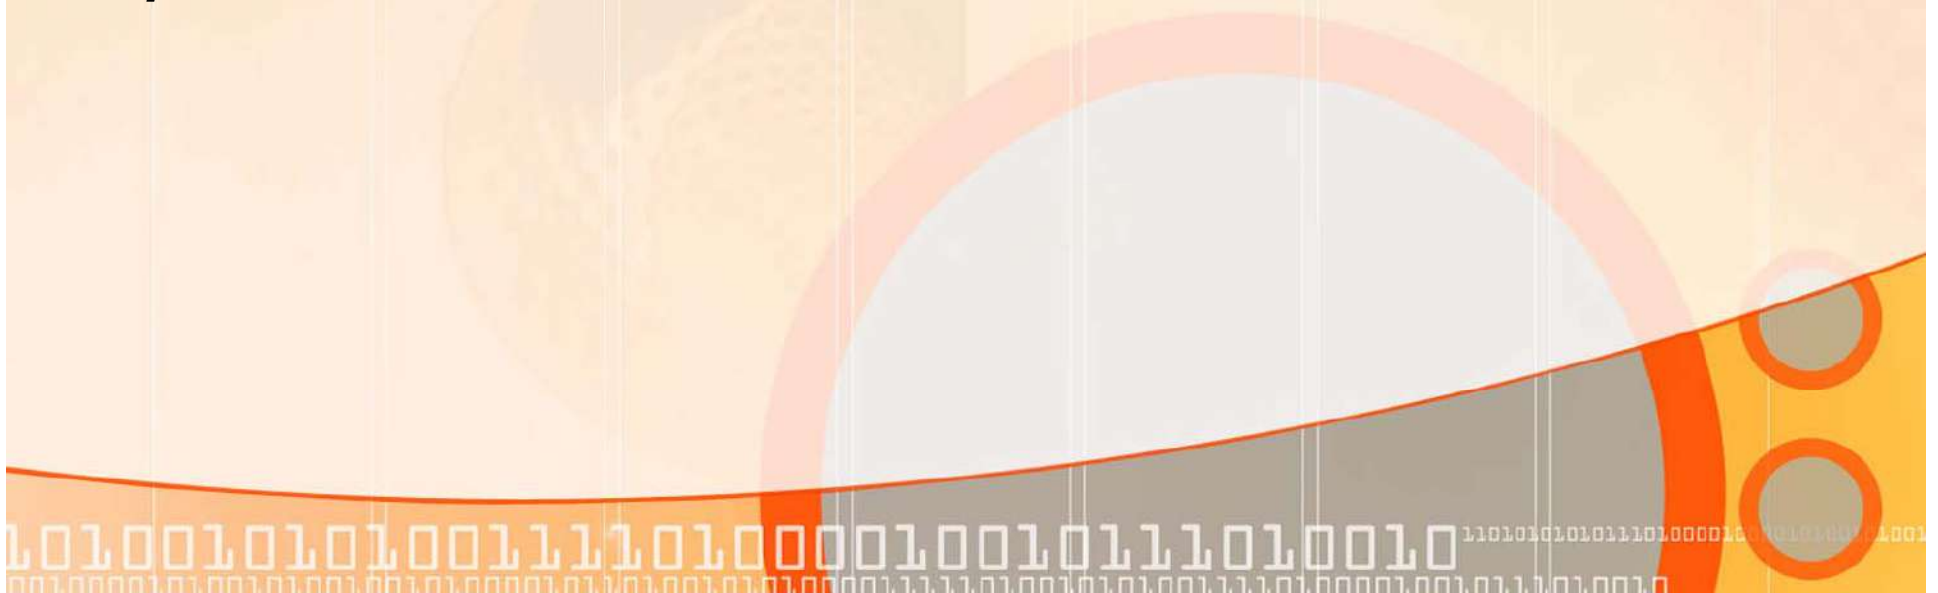

Wikis Have Controlled Access for Safety

**Security and safety is not an issue,
because teachers can control access**

Viewing – *teachers can open their Wiki to the public or limit to members only*

Membership – *teachers decide who can join; students, parents, invited guests, or the public*

Wikis Have Controlled Access for Safety

Protection – *because of the collaborative nature of Wikis, teachers can lock specific sections so other members cannot modify*

Moderation – *teachers can moderate all aspects of their Wiki for appropriateness*

Notification – *teachers can set up instant notification when a member makes a post or changes any aspect of the Wiki*

Permissions

The screenshot shows a Windows Internet Explorer browser window displaying the MathDemo Wiki's permissions page. The browser's address bar shows the URL: `http://mathdemo.wikispaces.com/space/permissions?responseToken=cc4bbe5388f12286d480f95c7c01b1cf`. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. The Favorites bar shows links to Village Elementary, VES News, and MathDemo. The browser's status bar at the bottom indicates 'Done' and 'Internet'.

The MathDemo Wiki page has a green header with the site logo and name. The user 'jdolan2726' is logged in, with links to 'My Wikis', 'My Account', 'Help', and 'Sign Out'. The page title is 'Wiki Permissions', and there is a link to 'Back to Manage Wiki'.

The left sidebar contains navigation links: 'New Page', 'Recent Changes', 'Manage Wiki', a search box, 'Favorites' (with links to 'home', 'All Pages', 'Demo Page', 'Use Pictures', and 'Navigation Options'), and 'edit navigation'.

The main content area lists four permission options:

- Public**: Everyone, including anonymous visitors, can view and edit pages. ☒ Allow discussion posts and comments from non-members.
- Protected**: Everyone can view pages, but only members of this wiki can edit pages. ☒ Allow discussion posts and comments from non-members.
- Private**: Only members of this wiki can view and edit pages. A green box highlights the text: 'Part of our Plus plan, [upgrade today](#) starting at \$5 per month! ★'.
- Custom**: Define custom permissions. A green box highlights the text: 'Part of our Super plan, [upgrade today](#) starting at \$20 per month! ★'.

An 'Update' button is located below the permission options.

Below the permission options is a section titled 'Custom Permissions'.
