

Class Progress Critique

Project: _____

One thing you did well and why you think that.
One thing you could improve on and how would you do that.

Name:

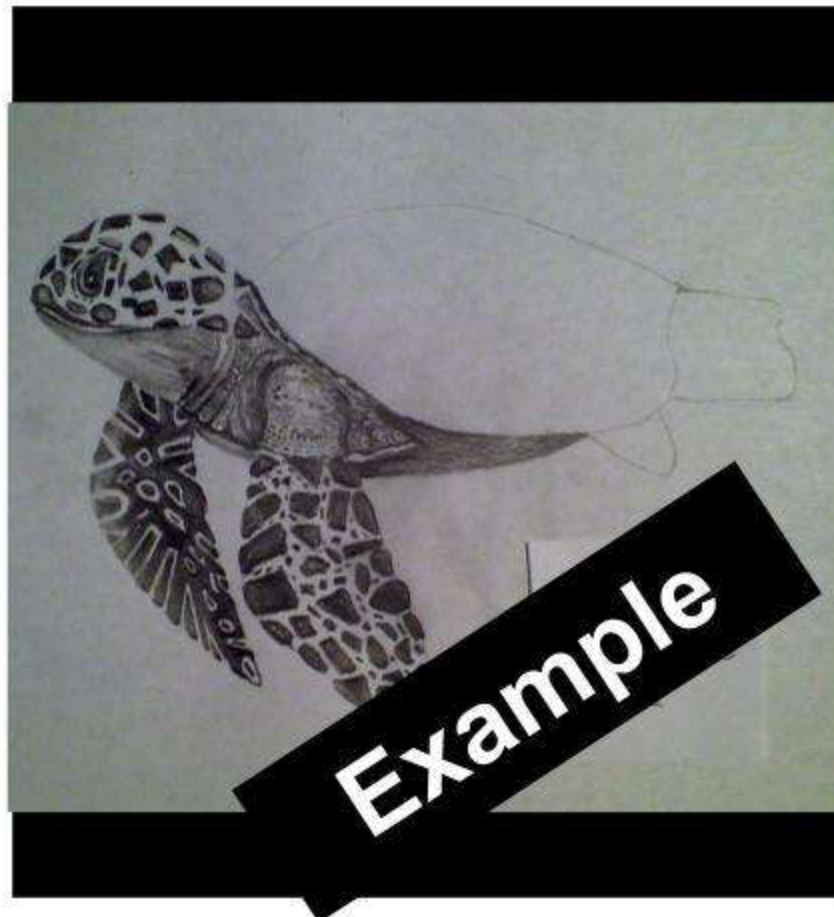

What did you do well? Explain why you think you did well on it..

I feel that I did well on the front back flipper. I was able to define the shapes with the white framing and dark value behind. I also think adding th slightly lighter value on the left side of the flipper helped to give it some reflection and dimension.

What do you need to improve on? Explain why you think you need to improve on it and what you would do to improve it.

There are two areas that I could improve on. I think that the placement of the eye is off. I need to move it to the right slightly. In addition, I need to add a few more dashes/dots around the shapes in the bottom of the front flipper. It seems incomplete right now.

Period #:

***Note: Just need one image it can be a selfie with your project or just your project**
