Do you feel like the class discussion (and the preparation for it) helped you learn more about nuclear power than you  
No, not personally, because I used what we learned in class as a basis for my argument. I do believe that this could  
Yes, i enjoyed learning things about this topic and would like to learn more.

Yes because i did not know some of the things all the teams had.

yes i would like to do it again

yes it would just in case one day I would know about all of this and I wish we could do this again and learn more about  
no becuz it was everyone talking and more understanding when having everyone different opinion

yes, I learned a lot of different pros and cons about nuclear energy. I can see from both sides now and understand why  
I think the notes would have been better but I enjoyed working together and hearing what others had to say. I learned

yes it was like us studying it and talking helps keep it in my mind longer

yes more activity's like that tend to help me learn better and feel like im doing something

Yes, for much better progress can express new ideas for much higher status of our work for protection against the danger  
yes I did because it felt more like you were in an Actual debate.Plus you learn more and hear about peoples opinion

A little because people said stuff that could help me learn.

I think it helped because I got to work with people and talk about it and do more research which was interesting

I think it helped a little bit because you get to talk about so if you dont understand something u can ask your teammate

yes i do because before i barely knew anything about them. Now i know my pros and cons

yes it help me a little bit i was kinda do it again but not really

No because i dont really understand it

Yes, everybody giving each other the pros and cons really helped us learn the bad and good thing about nuclear power  
i liked to talk about what we learned and discussed about it

Yes, i learned a lot from the sites that i visited even though it wasn't for long. There were a lot of specific and interesting  
i like what technique we had did i learn way better do these activity we had did

I did not really learn too much from it. I enjoyed researching stuff in books in the glossary because it is not too hard to  
Yes because it lets you learn more about energy and it gets you more active in class

Well i did learn a little but it was interesting since every group well shown information i didn't know and i learned a little bit  
Yes, it did i loved to hear other peoples opinion and it actually helped me know things i didnt know.

Yea because i didn't know really anything about nuclear power and i didn't even know that the nuclear plant produced  
yes because i feel like when you work with partners they help you understand it better. And it was fun to do

Notes would for sure help me understand it more, because right now i know about it but i'm not all the way sure about  
Yes it helped a lot cause i learned stuff i aint know

Helped me see more about nuclear power from researching and hearing what people said. It help me see the pros and  
yea i've learned alot about nuclear power but i would rather do notes instead

Yes it helped me learn more about nuclear power. It told me about some goods and some downsides about it.

Yes it helped me with learning more about it.It was good to research about it and talk about it with the people in your  
Yes because it helped us learn about the pros and cons about nuclear radiation.Nuclear radiation it can cause cancer

no i think notes are better cause when some people were talking i could barely hear them nothing is wrong with what  
yes, i was a little confused from the notes but when we did the class discussion i got it a lot more

I think it helped me a lot because there was some questions i had about nuclear power but the research helped a lot  
I feel like the preparation for the discussion was good. It was good I dont need to do it again.

If we did notes i would have learned the same like when i looked it up. But i did learn something from the discussion  
yes it helped me and i learned alot more from doing the discussion

Yes because it was a more hands on activity and let us all kind of talk it out together.

yes it helped me because i didn't really understand it at first. After the debate i understood it a lot more.

It might have if we'd just done notes? Give details explaining your thoughts. Please write at least two sentences.

It was more than what the notes would've given, but some of it wasn't necessary or just repeated information.

However. We should do that more often it helped me learn and understand more than just notes.

It was more. But it was fun and hope we do this later on and also tell the students to not look even though few will

use it. The class discussion helped because I got to hear it from different points of view and we talked about it.

follow but try that way it won't be choose because this student is here and more of their opnoin.
