

The Multiplication Game

Goal: Be the first person to own 3 spots in a row

Materials: objects in 2 colors to mark spots, pencil/pen

Directions: For Game 1, the first factor given is a 7. Player 1 may multiply 7 by any number 1-9, determine the product, place an object on the product, and write down the factor they chose down below. Player 2 now starts their turn using the factor Partner 1 chose and may multiply it by any number 1-9 (you can use the same number that was already chosen) and will then mark their product with their colored object. Play continues until one player owns 3 spots in a row horizontally, vertically, or diagonally. Then, the gameboard is cleared and you will begin with Game 2 and the factor 5.

The Multiplication Game

1	2	3	4	5	6
7	8	9	10	12	14
15	16	18	20	21	24
25	27	28	30	32	35
36	40	42	45	48	49
54	56	63	64	72	81

Record your numbers below:

Game #1: 7, __, __, __, __, __, __, __, __, __, __

Game #2: 5, __, __, __, __, __, __, __, __, __, __

Game #3: 4, __, __, __, __, __, __, __, __, __, __

Game #4: 9, __, __, __, __, __, __, __, __, __, __
