

The Pencil...

And how it changed our lives

By Sydney Steiner

History of the Pencil 😊

- The pencil
- The inventor of the pencil was Conrad Gessner
- The pencil was made in 1564
- Incased in wood, lead in the hollow part, sometimes it has an eraser at the end

Good Information 😊

The pencil changed people's lives by being able to write without a mess. If people wanted to write a letter, all they had to do is pick up a pencil and start. Before the pencil there was the ink and a feather. Before the ink and a feather there were many different ways to communicate. Since ancient times! The pencil is an easier, more affordable way to write.

The Pencil's Influences

After the pencil was invented, it influenced people to make other objects like it. Some examples are the mechanical pencil, colored pencil, the marker, and the pen.

Conclusion

In conclusion pencils have been around for many years helping people write. The pencil has also influenced many writing tools that people use every day.
