# Directions:

1. There are two different templates in this presentation. One has white icons and on has black icons.
2. Once you pick one to use, delete the other one.
3. Go to Insert > Image and upload an image into the slide.
4. With the image still selected, click on Arrange > Order > Send to back. You can then use your arrow keys to position it appropriately.

Other Ideas:

● Use video instead of an image! Instead of Insert > Image, you can go to Insert > Video and upload a video from your Google Drive.
● Add speech bubbles, callouts, or other shapes to your image.
