CONTENTS

A Circle of Sorts, 1	Line in a Circle, 36	Letter Sizes, 71
A Fancy W, 2	Pizza Box, 37	Drawers, 72
Silly Lump, 3	Stacking Boxes, 38	Circle Chase, 73
Banana, 4	Triangle Wall, 39	At the Beach, 74
A Stringy Finger, 5	Birthday Wish, 40	Shadow Pictures, 75
Pancakes, 6	Yummy, 41	Table Talk, 76
Fat F, Skinny E, 7	Paper on Paper, 42	Zoops, 77
Rainbow Window, 8	Tipped Glass, 43	Doughnut Bites, 78
This Way Up, 9	Birds on Wires, 44	Eleven Little O's, 79
River and Lake, 10	Dots in a Square, 45	Scissors Part, 80
Stuck Letters, 11	Invisible Person, 46	Box of Jars, 81
Coat Hanger, 12	Circle Touch, 47	Broken Circle, 82
Cat Trouble, 13	Dusty Table, 48	Sandwich of Sorts, 83
Jumping Line, 14	Happy Birthday, 49	Spiral Cookies, 84
Tree Work, 15	A Line of L's, 50	In the News, 85
Popsicle, 16	Dandelions, 51	Tennis Ball Can, 86
Shapes in Shapes, 17	Plakys, 52	Let Me In, 87
Doggy Dress-up, 18	Missing Button, 53	Pie Chase, 88
Bowls, 19	So Many Circles, 54	T's and Triangle, 89
Strong Buttons, 20	Window Dressing, 55	Ice Cream Cone, 90
Paper Roll, 21	Puzzle Pieces, 56	Twins, 91
Five and Seven, 22	Two A's, Tall T, 57	Jigsaw Puzzle, 92
Alphabet Circus, 23	The Forest, 58	Photo, 93
Jack-O'-Lantern, 24	Hanging Towel, 59	Bookshelf, 94
Crisscross, 25	Moving Day, 60	Cookie Cuts, 95
Skinny Snowman, 26	Leaners, 61	Cozy Triangles, 96
Two Scoops, 27	Upside Down, 62	Swing, 97
Egg Danger, 28	Neat Initials, 63	Pyramid, 98
You've Got Mail, 29	Sidewalk, 64	Lines and Triangles, 99
Triangle Balance, 30	Ant Scramble, 65	Juice Glass, 100
Dream House, 31	Squares and Dots, 66	Circle Roll, 101
Name Fade, 32	Balloons, 67	Puddle Tracks, 102
Rainy-Day A, 33	Cute Octopus, 68	Necklace, 103
Two Balloons, 34	Umbrella, 69	Side-by-Side H's, 104
Footprints, 35	Halfaphant, 70	Half Empty, Half Full, 105

INTRODUCTION

This book is designed to help children develop the kind of visualization skills that lie at the heart of problem-solving and creativity. It also gives students excellent practice at listening.

How does the concept work? Here are a couple of activities that will give you the idea.

For a moment, please play the part of the student. This is what your teacher (or parent) says to you:

"A father and his young son went walking in the snow. They left tracks that you can see from above. How would that look?"

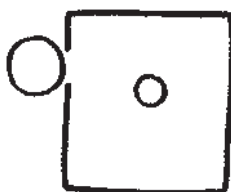

Another:

"A circle found a hole in the side of a square just big enough for it to get in, and went inside. Its friend, also a circle, tried to get in, but it was too big. How would that look?"

In the first example, students would obviously have to think about shoe sizes. But that's not all. The matter of stride must be considered. A father's footprints would be farther apart than the child's. The footsteps also have to be going in the same direction. Thus, an adequate response would be:

In the second example, students grapple with a more abstract situation—circles and squares. To be successful, they must make a square with a "door" that is just about the size of a circle, and the circle must then be drawn inside the square. But the second circle, outside of the square, has to be drawn larger. Remember, it must be too large for the opening. So the solution might look something like this:

A few notes about how to use this book: You may choose to do the activities in a structured fashion, doing three or four at a specific time each day. Or you can take a more informal approach, doing them whenever you have five or ten minutes of free time. Each activity is designed to stand on its own.

Most of you will probably want to do the activities orally. This helps improve listening skills and direction-following as well as encouraging visual and conceptual thinking.

You may also reproduce the activities and put several of them together in a center. If you do, you may want to cut out the challenges, laminate them, and keep the picture-solutions in the book. Each is numbered for easy reference.

Keep in mind that the solutions included in this book are just suggestions, not hard-and-fast answers. They are meant to be used as guides showing how children may approach each activity. This is not an art book—the quality of the final drawings is not nearly as important as the thinking that goes into them.

Like our other books, we start with easier activities in the early pages and move gradually into more difficult challenges.

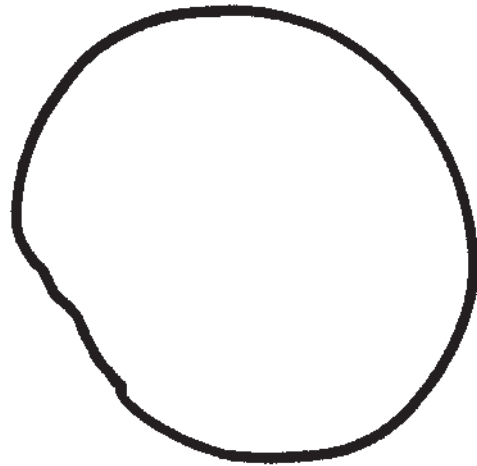

We trust you and your students will have many good moments—many enlightening moments—ahead!

— Greta Rasmussen and Matt Rasmussen

A CIRCLE OF SORTS

I was trying to draw the
very best circle
I could and I was
almost finished when
the dog jiggled the
table. How would
that look?

1

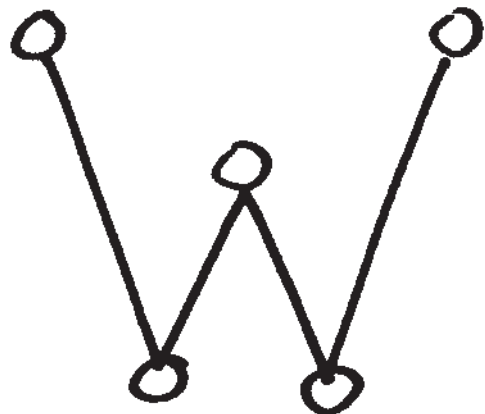

1

A FANCY W

Someone decorated
a big capital W by
putting little tiny O's
on all of its points.
How would that look?

2

2

SILLY LUMP

My silly little brother
thought he was
hiding from my mom
by crawling under the
blanket. How would
that look?

3

3

BANANA

I peeled the banana
halfway down and
then took a big bite.
How would that look?

4

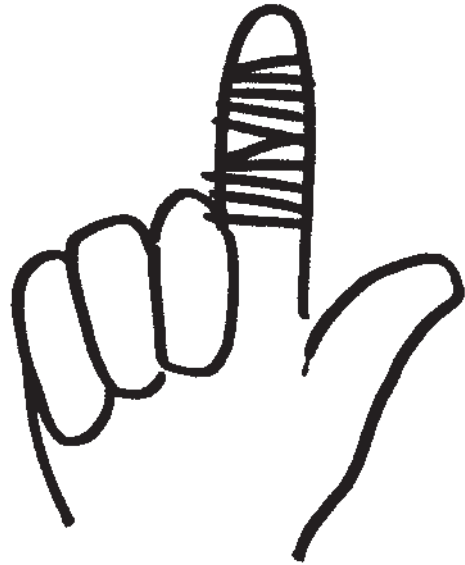

4

A STRINGY FINGER

I wound a string
around my finger
ten times. How would
that look?

5

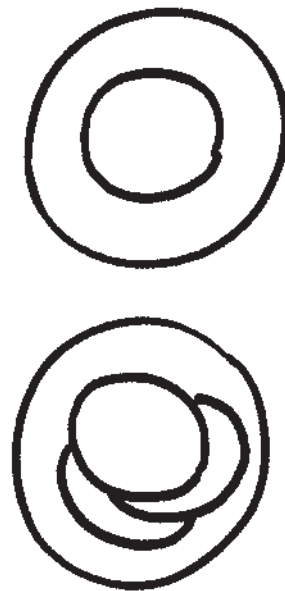

5

PANCAKES

My sister likes to eat
pancakes in a neat
stack, and I like mine
spread out with some
pancakes partly on
top of each other.
From above, how
would that look?

6

6

FAT F, SKINNY F

A very fat capital F is standing right in front of a very skinny capital E that is as tall as the F. How would that look?

7

7

RAINBOW WINDOW

I could see just half of the rainbow from my bedroom window because a big tree was in the way. How would that look?

8

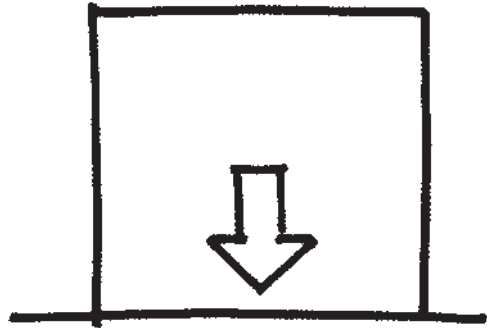

8

THIS WAY UP

The box had a big arrow which showed which side was supposed to be up, but someone had not been careful and had turned the box over. How would that look?

9

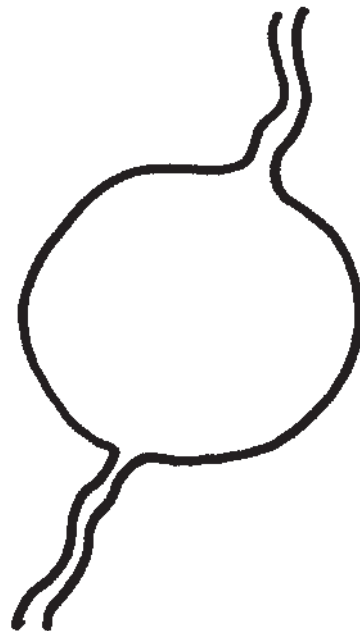

9

RIVER AND LAKE

From an airplane I saw a winding river that flowed into a round lake and then came out the other side. How would that look?

10

10

STUCK LETTERS

An O and a V
are stuck in a
capital E. They are
stuck so tightly that
they can't get loose.
How would that look?

11

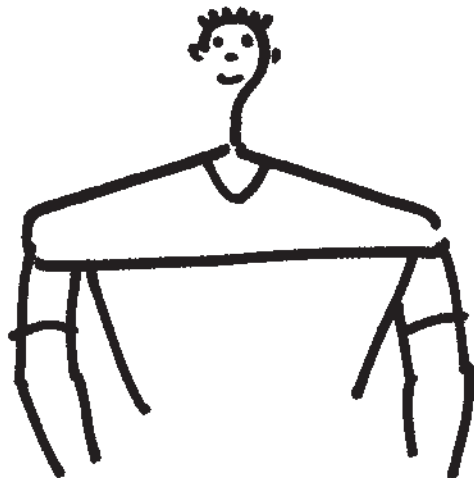

11

COAT HANGER

I traced around a coat
hanger and turned my
drawing into a picture
of a person with a
small head and very
broad shoulders.
How would that look?

12

12

CAT TROUBLE

Someone used my hairbrush to brush my cat. Now it looks really yucky. How would that look?

13

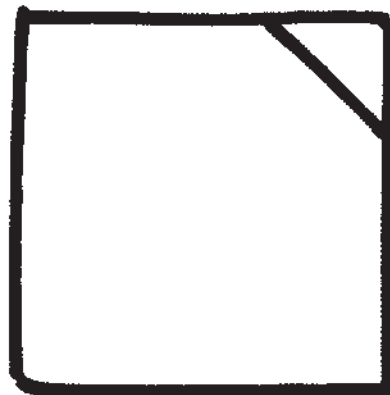

13

JUMPING LINE

A little line jumped into a square and helped to make a triangle in one corner. How would that look?

14

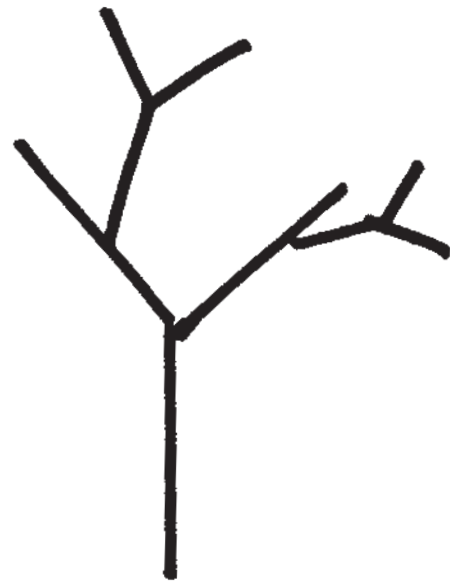

14

TREE WORK

Three capital Y's
of different sizes
got together and
pretended they were
a tree. How would
that look?

15

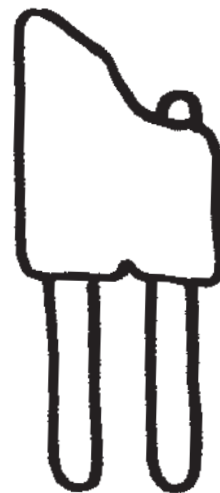

15

POPSICLE

I ate the Popsicle
to the place where
the top of one of the
two sticks showed
just a little bit. How
would that look?

16

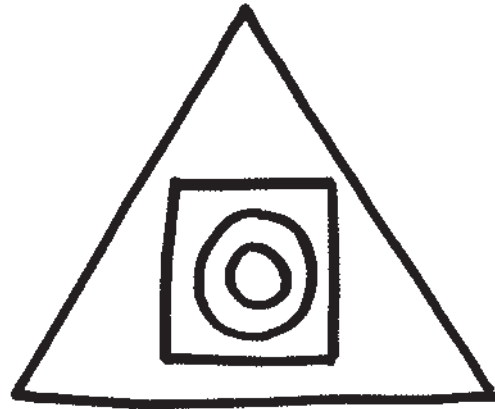

16

SHAPES IN SHAPES

A circle is inside another circle, and the circles are both inside a square, which is inside a big triangle. How would that look?

17

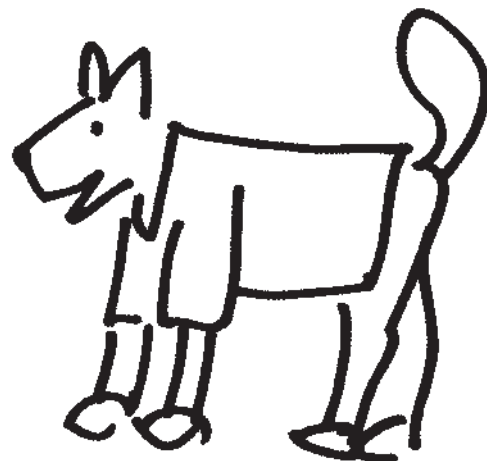

17

DOGGY DRESS-UP

I put a T-shirt on our dog and he looked really cute. How would that look?

18

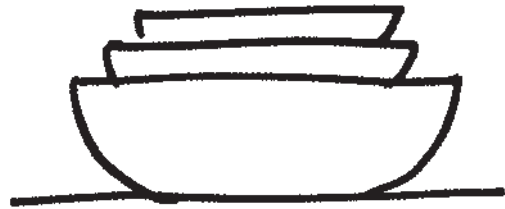

18

BOWLS

In a kitchen cabinet,
my mom keeps
a bowl inside a bowl
inside another bowl.
How would that look?

19

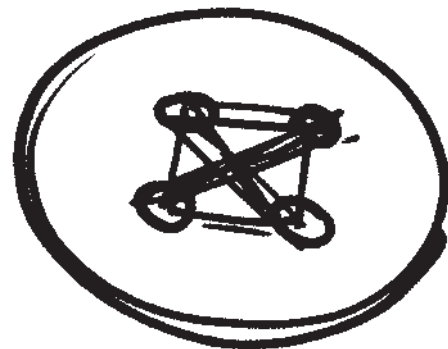

19

STRONG BUTTONS

Each of the buttons
on my shirt has four
holes. Someone has
sewn them on to
make them as strong
as possible. How
would one of the
buttons look?

20

20

PAPER ROLL

I rolled up a piece of notebook paper and then I tied a piece of string around the middle of the paper so tightly that the paper roll was dented in. How would that look?

21

21

FIVE AND SEVEN

Number 5 is missing its top but you can't tell because Number 7 is standing right next to it. How would that look?

22

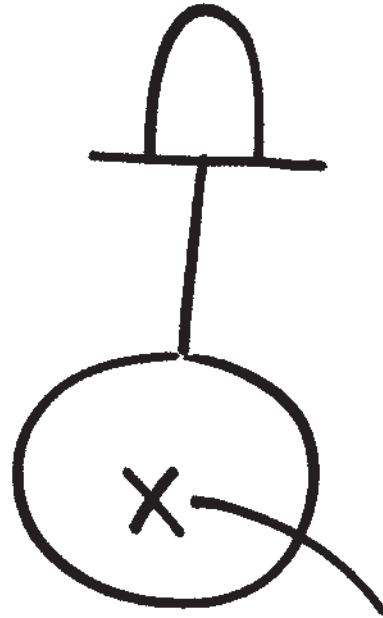

22

ALPHABET CIRCUS

I went to the alphabet circus and I saw a capital T wearing an upside-down U for a hat. The T was standing on a big O and a little x was jumping through the O. How would that look?

23

23

JACK-O'-LANTERN

I made a jack-o'-lantern with a triangle for a nose, a grinning mouth with three teeth and one eye bigger than the other. How would that look?

24

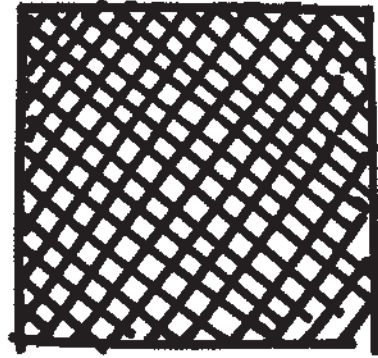

24

CRISSCROSS

First I drew a small box. Then I filled up the box with so many crisscrossed lines that it looked more like a dark square than a box filled up with lines. How would that look?

25

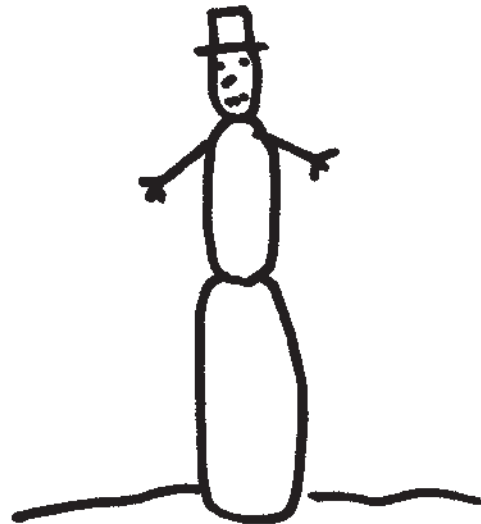

25

SKINNY SNOWMAN

The snowman I made was so skinny that it looked funny. How would that look?

26

26

TWO SCOOPS

At the ice cream store,
I ordered two scoops of
chocolate chip ice
cream in a sugar cone.

You could see just
a little part of the first
scoop because it was
way down inside the
cone. But you could see
all of the second scoop.
How would that look?

27

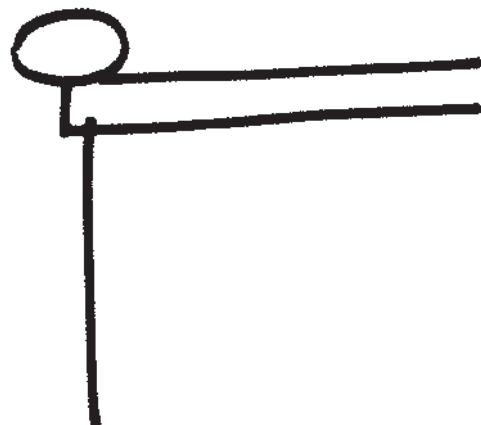

27

EGG DANGER

Uh-oh! That egg is
sitting as close to the
edge of the counter
as it possibly can
without falling off.
How would that look?

28

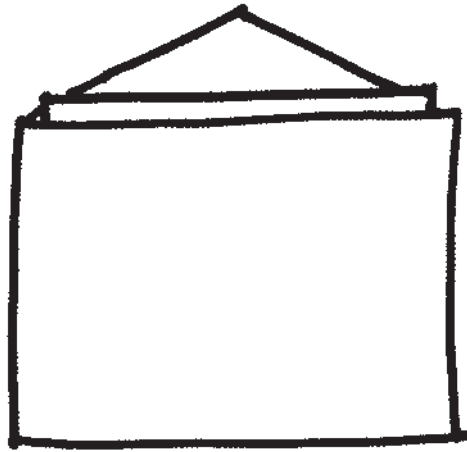

28

YOU'VE GOT MAIL

The envelope was open and the flap was up and you could see a little bit of a card sticking out. How would that look?

29

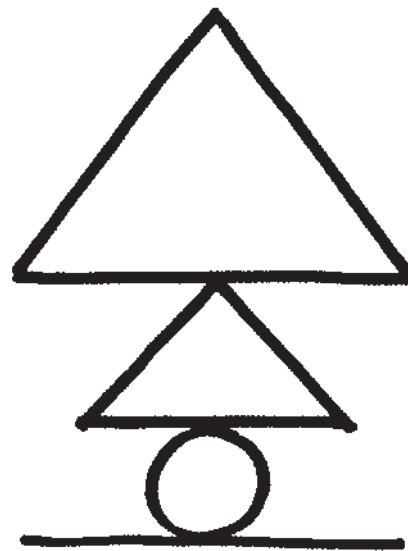

29

TRIANGLE BALANCE

A triangle with three equal sides is balanced exactly on top of a smaller triangle that is balanced on top of a little circle. How would that look?

30

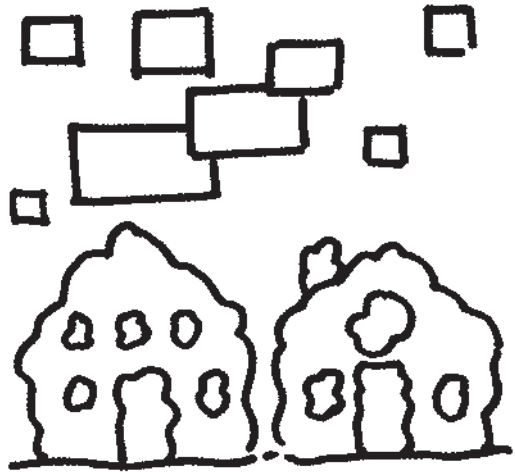

30

DREAM HOUSE

I had a dream that
all the clouds were
squares and rectangles
and all the houses were
round and puffy. How
would that look?

31

31

NAME FADE

I was writing my
name but my pen
was running out
of ink and the letters
got fainter and
fainter as I went
along. How would
that look?

32

Melissa

32

RAINY-DAY A

A capital A didn't want to get wet so it wore an upside down V as a hat. How would that look?

33

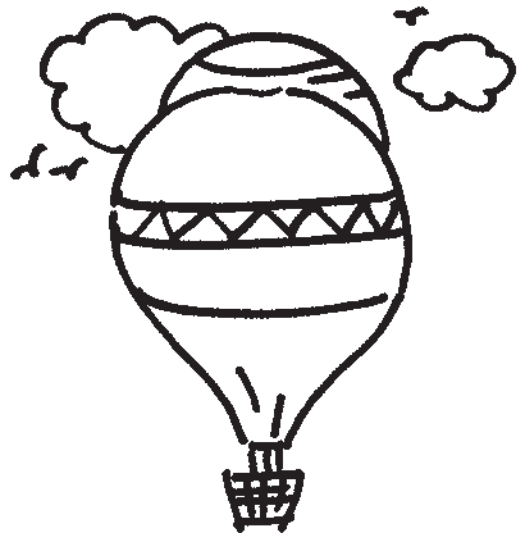

33

TWO BALLOONS

Two hot air balloons were floating in the sky. One was in front of the other and I could only see the top of the one farthest away. How would that look?

34

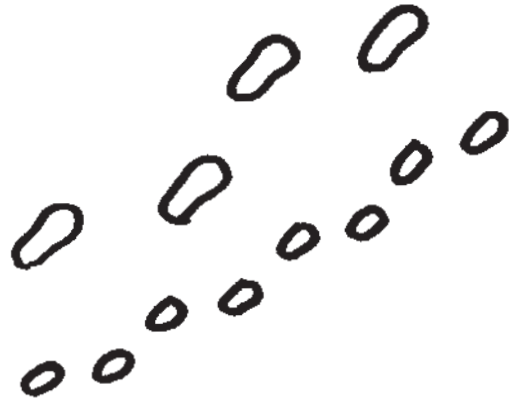

34

FOOTPRINTS

A father and his young son went walking in the snow. They left tracks which you can see from above. How would that look?

35

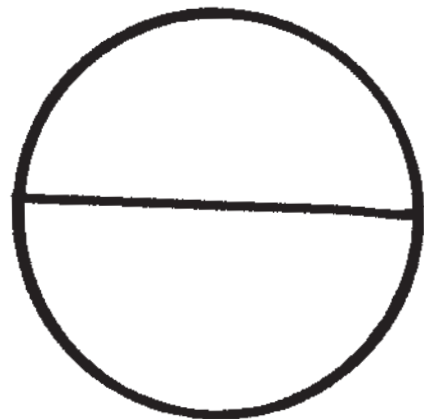

35

LINE IN A CIRCLE

Someone has drawn a straight line inside a circle. The line is as long as it can possibly be without poking through the sides of the circle. How would that look?

36

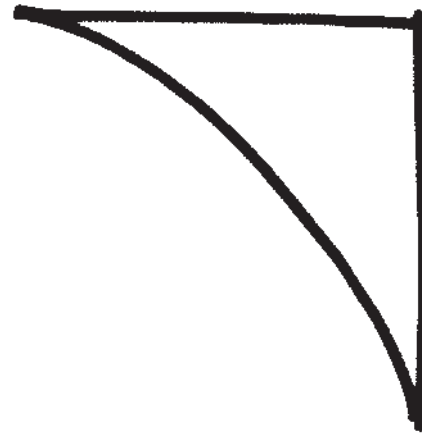

36

PIZZA BOX

I opened the pizza box and saw that the round pizza was as large as it could be and still fit in the box. Of course, you could still see the bottom of the box in four places. How would one of those places look?

37

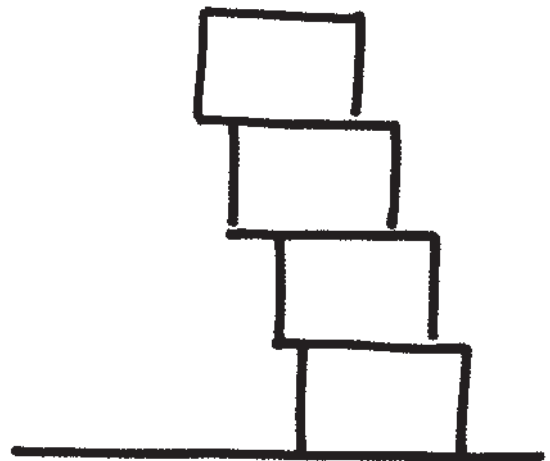

37

STACKING BOXES

Four boxes of the same size were stacked on top of each other, but they looked like they were about to fall over. How would that look?

38

38

TRIANGLE WALL

Three triangles—a little one, a medium-sized one, and a big one—stood behind a wall that was just as tall as the little triangle. How would that look?

39

39

BIRTHDAY WISH

I guess my sister didn't get her wish.

At her eighth birthday party, she only blew out half of the candles on her first try. How would that look?

40

40

YUMMY

I made the word "yummy" out of spaghetti. I used cooked spaghetti for the first three letters and uncooked spaghetti for the last two letters. How would that look?

41

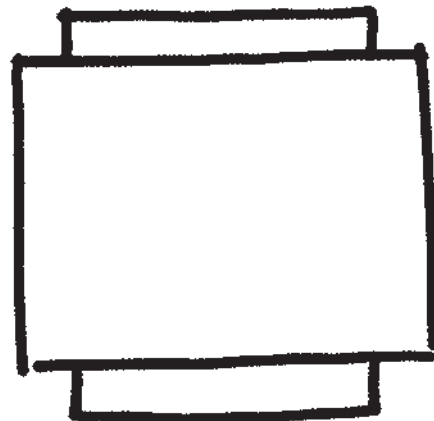

41

PAPER ON PAPER

I laid a rectangular piece of paper crosswise on another piece of paper of the same size and shape. How would that look?

42

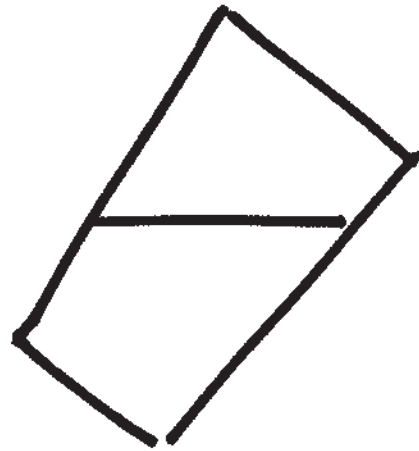

42

TIPPED GLASS

Even though the glass was tipped, the water was still level. How would that look?

43

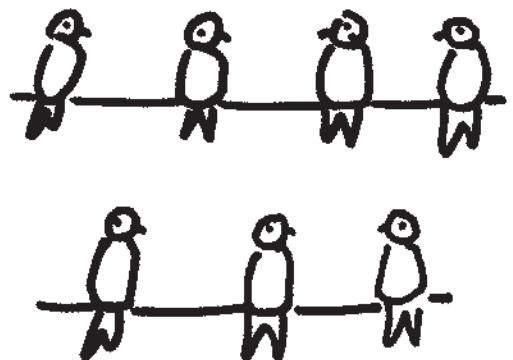

43

BIRDS ON WIRES

Four birds are sitting on a telephone wire. They are evenly spaced. Three birds are sitting on another wire below it, but none of the birds on the bottom wire is directly below any of the top birds. How would that look?

44

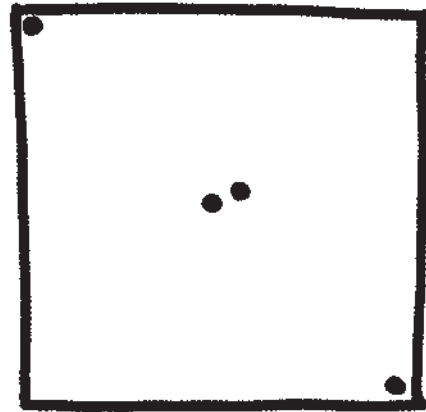

44

DOTS IN A SQUARE

Four dots hopped into a square to play. Two of the dots stayed close together near the center of the square, and the other two got as far away from each other as they could. How would that look?

45

45

INVISIBLE PERSON

An invisible person is running. The person's clothes and shoes are not invisible. How would that look?

46

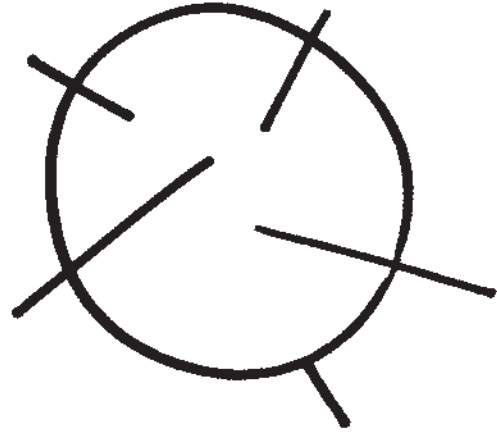

46

CIRCLE TOUCH

Five lines are touching a circle. Four of the lines are poking through the circle, but one isn't. How would that look?

47

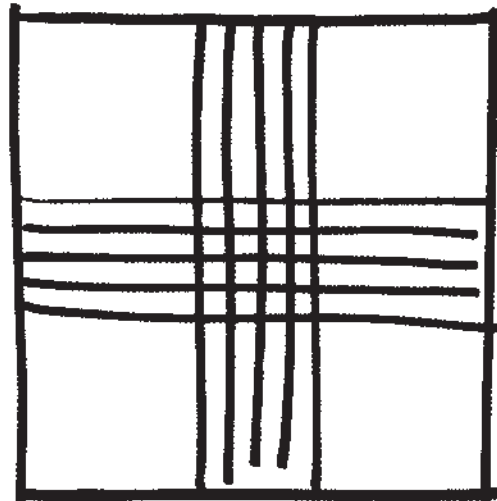

47

DUSTY TABLE

The table was very dusty. Just for fun, I spread out my fingers and ran them across the tabletop, from one side to the other. Then, I started at another edge and ran my fingers across the tabletop in another direction. How would that look?

48

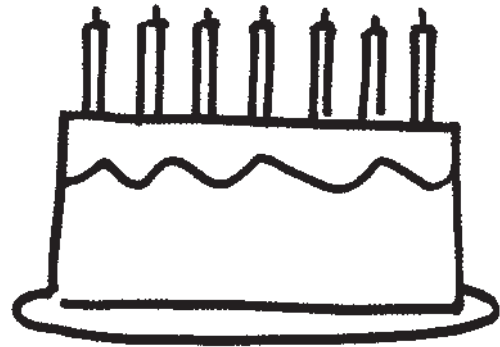

48

HAPPY BIRTHDAY

The candles on
my birthday cake
are half as tall as
the cake is thick.
How would that look?

49

49

A LINE OF L's

Four capital L's
were lined up next
to each other and
then a horizontal line
stretched out across
their tops, creating
three rectangles. How
would that look?

50

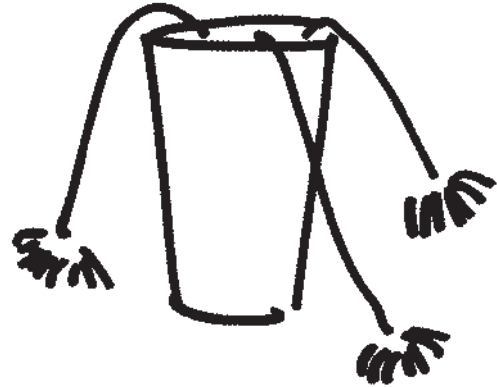

50

DANDELIONS

My little brother
picked some dandelions
yesterday for my mom.
He brought them home
and put them in a little
glass, but he forgot
to put any water in
the glass. How would
that look?

51

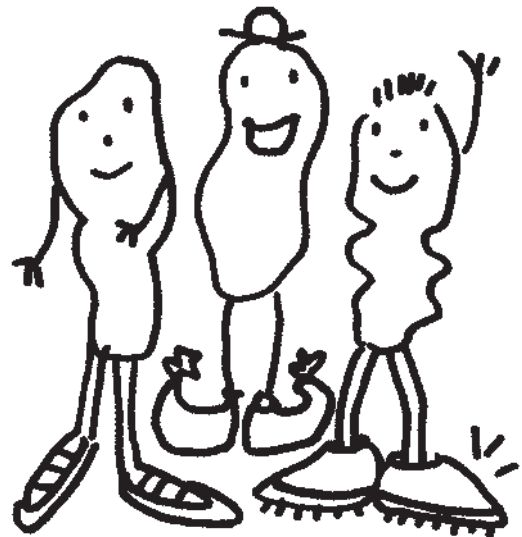

51

PLAKYS

I had a dream that
all the plakys were
wearing crazy shoes.
What's a plaky? That's
for your to figure out.
How would that look?

52

52

MISSING BUTTON

My brother has a shirt with five buttons. The middle button is missing, but he is wearing the shirt anyway. How would that look?

53

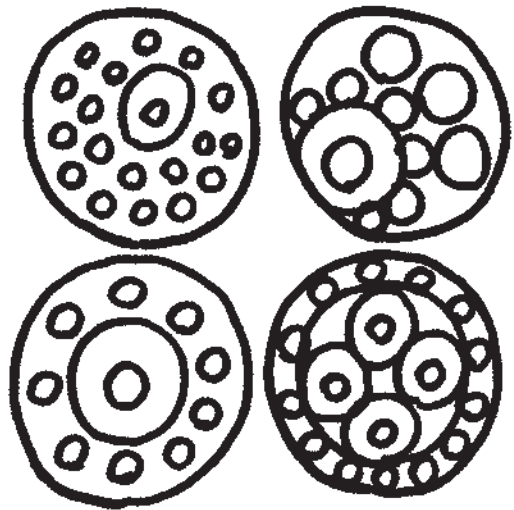

53

SO MANY CIRCLES

I drew four circles and filled them all up with other circles. I used a very different idea for each circle drawing, but I made sure that when I had finished you could say, "There are four circles filled with circles."
How would that look?

54

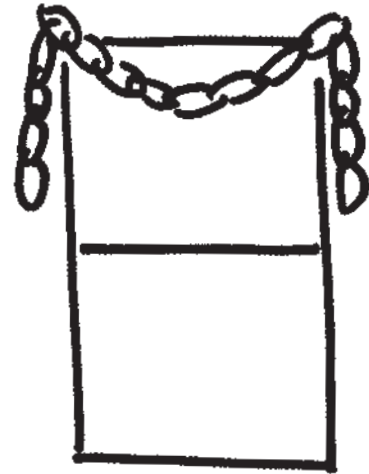

54

WINDOW DRESSING

I made a paper chain and hung it over a window in my bedroom for decoration. How would that look?

55

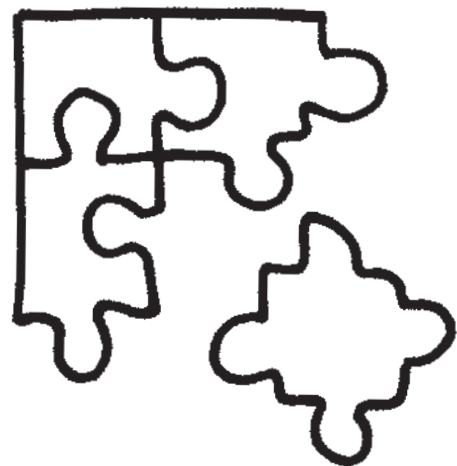

55

PUZZLE PIECES

Three of the puzzle pieces fit together, but the fourth didn't go with the others at all. How would that look?

56

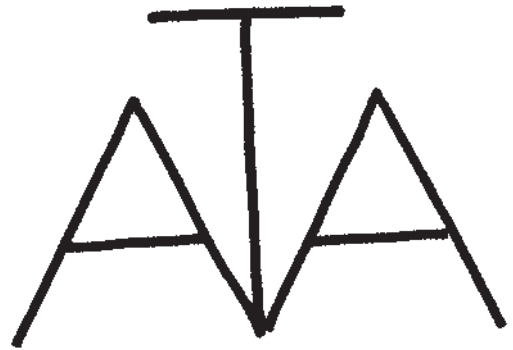

56

TWO A's, TALL T

Two capital A's are touching each other and they both are touching a capital T. How would that look?

57

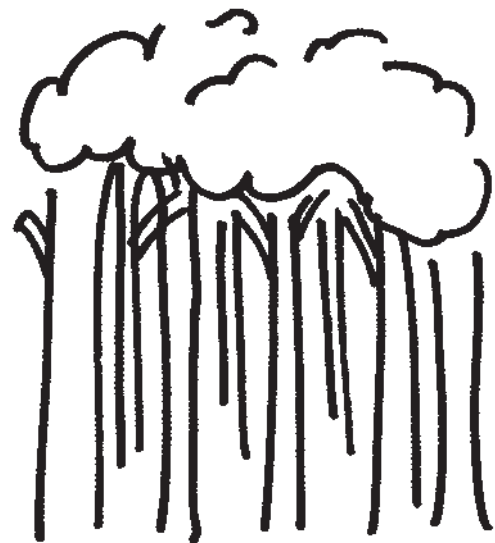

57

THE FOREST

There are so many trees that I can't see very far back into the forest. How would that look?

58

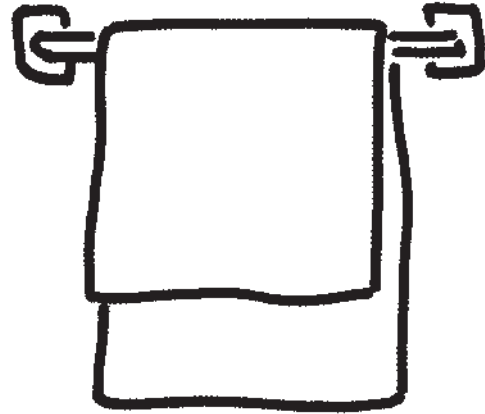

58

HANGING TOWEL

I did a sloppy job
of hanging the towel
on the towel rack.
It was crooked, and
both ends showed.
How would that look?

59

59

MOVING DAY

We are moving today.
There are three boxes on
the floor of our
living room. The big
one holds twice as
much as the medium-
sized one, and the
medium-sized one
holds twice as much
as the small one. How
would that look?

60

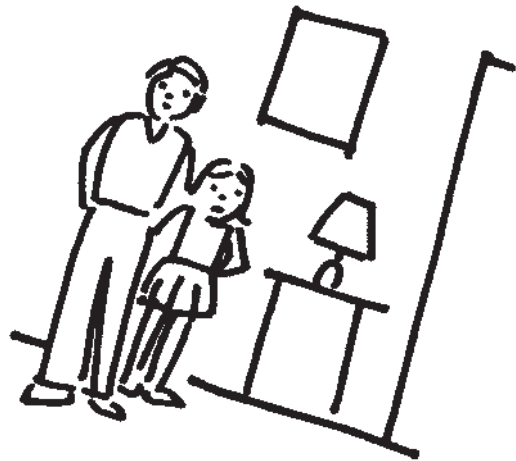

60

LEANERS

I had a dream
that everyone and
everything in the
room was leaning
in the same direction.
How would that look?

61

61

UPSIDE DOWN

My mom's glasses
were lying upside down
on the table. How
would that look?

62

62

NEAT INITIALS

My name is
Sara Smith and
I have a really
neat way of writing
my initials. How
would that look?

63

63

SIDEWALK

Somebody made
the sidewalk so
it would go around
a big tree. They
had to cut the tree
down later but the
sidewalk is still
there. How would
that look?

64

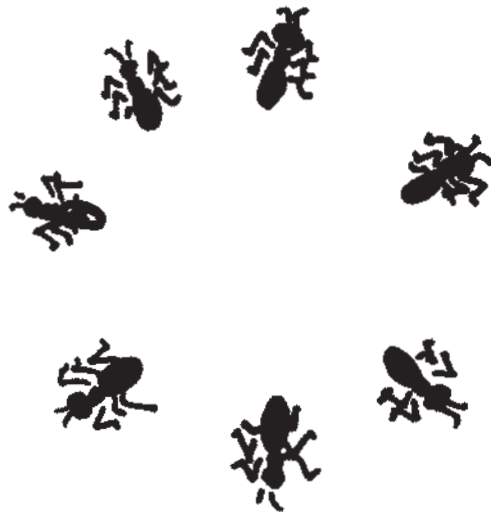

64

ANT SCRAMBLE

I caught seven ants
under a tin can. When
I lifted the can up
I could see that the
ants were all trying
to get out by crawling
under the edge of
the can. How would
that look?

65

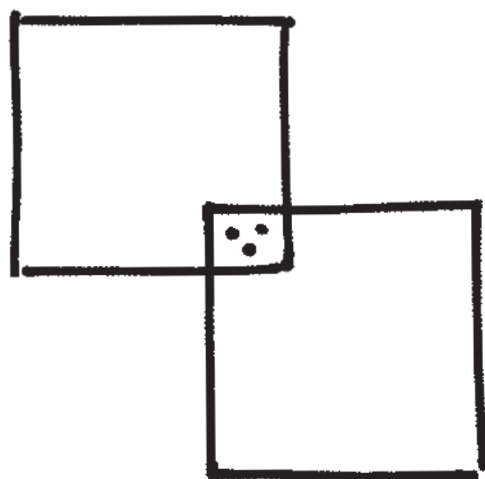

65

SQUARES AND DOTS

Two squares were
overlapping in a way
that formed a little
square where three
dots were hiding. How
would that look?

66

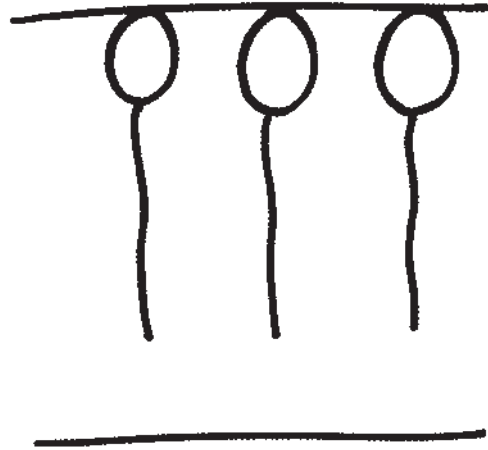

66

BALLOONS

Even though I'm short,
I know I won't have
any trouble getting
my birthday balloons
down from the ceiling.
How would that look?

67

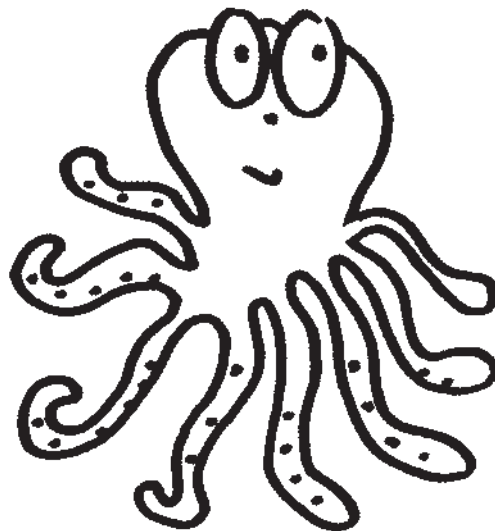

67

CUTE OCTOPUS

Not many people
would think a real
octopus is cute, but
I saw a cartoon of
one that was really
cute. How would
that look?

68

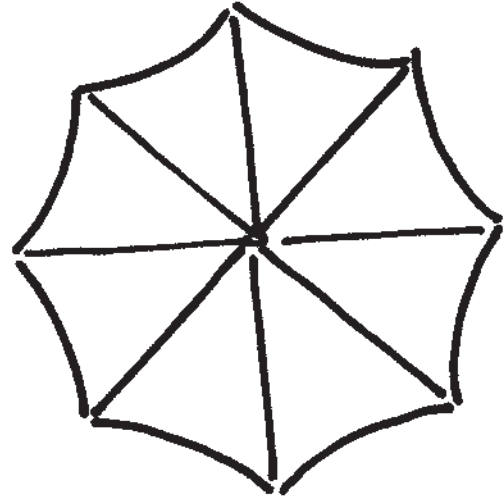

68

UMBRELLA

You can tell a lot about how an umbrella is made if you look up while you're under it. How would that look?

69

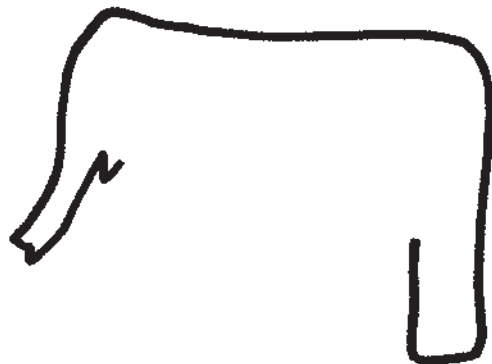

69

HALFAPHANT

My pencil lead broke when I was about halfway finished making a drawing of an elephant, but you could still tell what it was going to be. How would that look?

70

70

LETTER SIZES

A capital C is surrounded by eight capital letters, but only two of the letters would fit into the C shape. How would that look?

71

71

DRAWERS

In my bedroom, I have a chest with five drawers. Three of the drawers are the same size. The other two drawers are alike but different in size from the three others. How would that look?

72

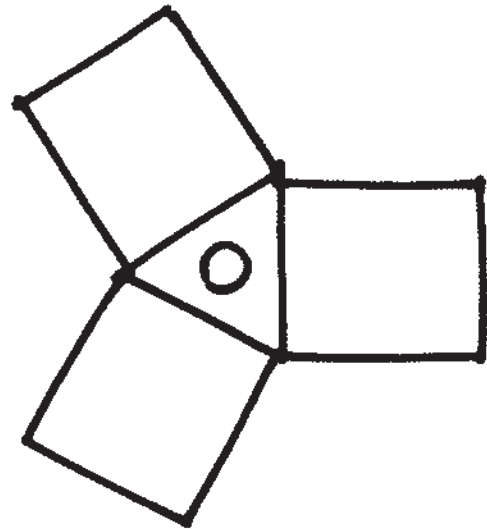

72

CIRCLE CHASE

Three squares were chasing a little circle. Finally, they found a way to put themselves together so that the circle couldn't get away. How would that look?

73

73

AT THE BEACH

I was at the beach, and I could tell some kids had dug a deep hole in the sand even though from where I was standing, I couldn't see the hole. How would that look?

74

74

SHADOW PICTURES

We were making shadow pictures on the wall. I used my fist and two fingers to make the head of a rabbit. How would that look?

75

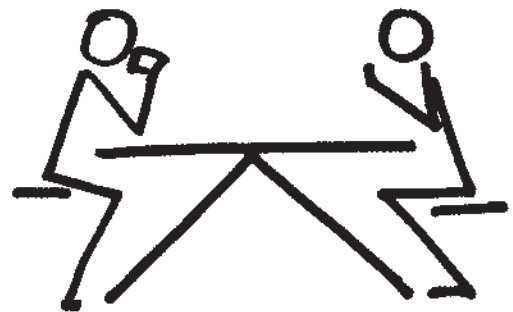

75

TABLE TALK

A capital K tipped over on its side to make a table where two little stick people were eating. How would that look?

76

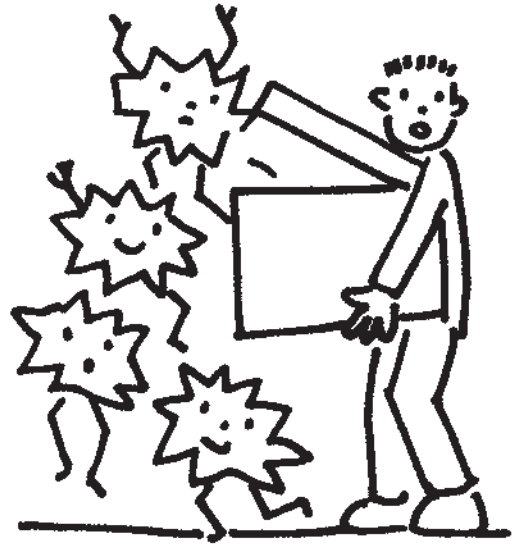

76

ZOOPS

I had a dream that a box I was carrying came open and the zoops got out. What's a zoop? That's for you to figure out. How would that look?

77

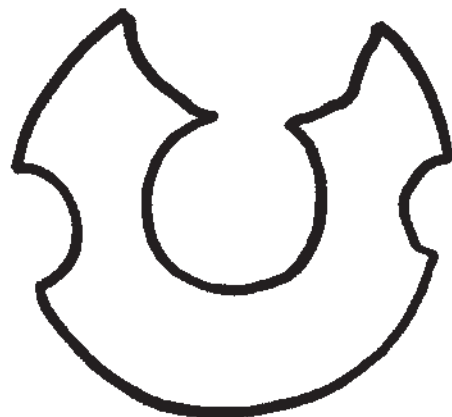

77

DOUGHNUT BITES

I was hungry but I didn't want to eat my doughnut too fast. So I took a little bite and then I turned the doughnut halfway around and took another little bite. After that, I couldn't help myself and took a great big bite in between the first two little bites. How would that look?

78

78

ELEVEN LITTLE O's

A capital T told five little o's they could sit on its top. At the same time, a capital M told six other small o's they could rest in the space between its points. Suddenly, the capital T and the capital M became invisible, but all the little o's stayed in place. How would that look?

79

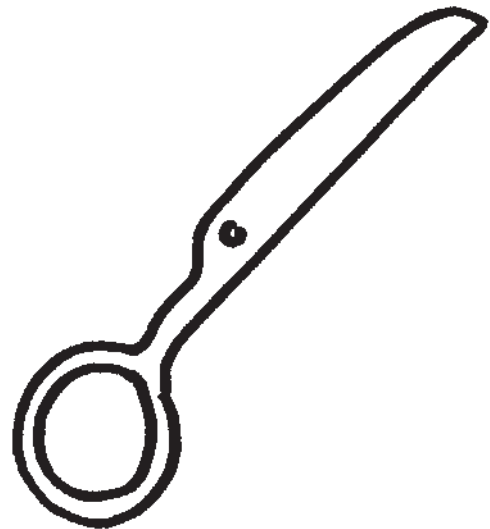

79

SCISSORS PART

Think of just one half of a pair of scissors. How would that look?

80

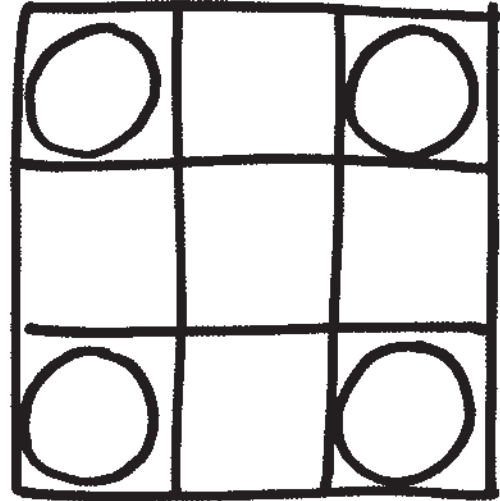

80

BOX OF JARS

At the grocery store
I saw a box that was
divided into nine square
spaces so it could hold
nine jars of jam. There
were four jars left, and
they were all separated
from each other by
at least one space.

From above, how
would that look?

81

81

BROKEN CIRCLE

A circle broke into
six curved pieces
and then the pieces
snuggled up together
as closely as they
could. How would
that look?

82

82

SANDWICH OF SORTS

My silly little sister
made a sandwich
but she forgot to put
anything between the
two slices of bread. How
would that look?

83

83

SPIRAL COOKIES

One day I helped my mom
make cookies. First, we
rolled some light-colored
dough out flat. Then, we
spread some thick chocolate
on the dough. Then, we
rolled the dough up like you
would roll up a rug. Finally,
we cut the rolled-up dough
into sections like little
wheels and baked them in
the oven. How would one
of the finished cookies look
lying down flat?

84

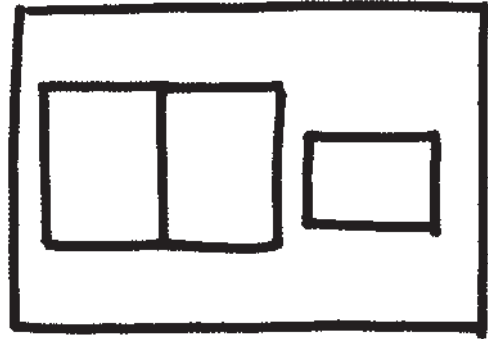

84

IN THE NEWS

Two newspapers of the same size are on a table. One is opened so that two side-by-side pages show. The other is not open and is folded in half. How would that look?

85

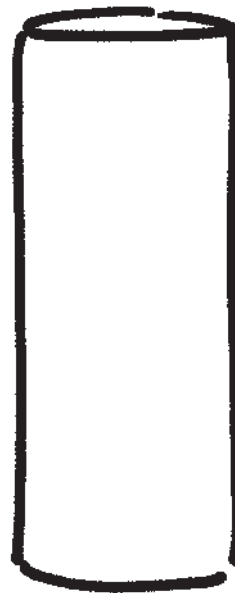

85

TENNIS BALL CAN

A can held three tennis balls. The balls fit exactly into the can with no extra space around them. How would the can look from the side?

86

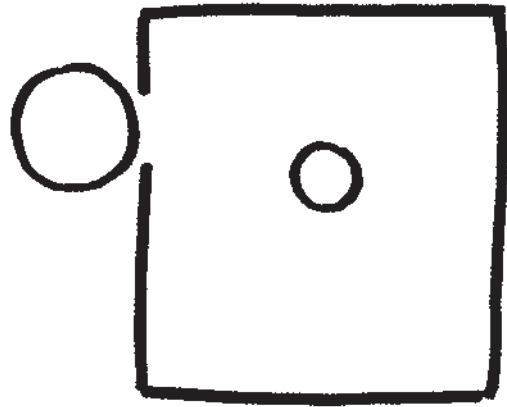

86

LET ME IN

A circle found a hole in the side of a square just big enough for it to get in, and went inside. Its friend, also a circle, tried to get in, but it was too big. How would that look?

87

87

PIE CHASE

I had a dream that three pieces of pie grew legs and were running away from a big hungry bird that wanted to eat them. How would that look?

88

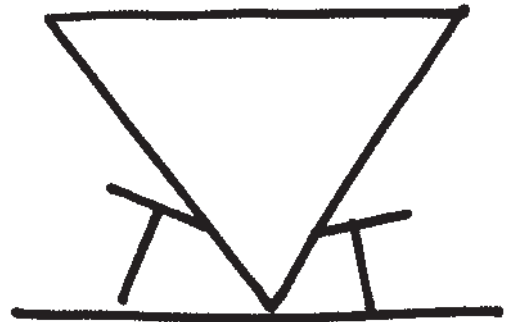

88

T'S AND TRIANGLE

A big triangle was trying to balance on one of its points when two capital T's came along and helped keep the triangle from tipping over. How would that look?

89

89

ICE CREAM CONE

I was drawing a picture of an ice cream cone when the lights went out. I went ahead and finished my drawing in the dark. How would that look?

90

90

TWINS

Two identical twins wearing the same clothes stood back to back, looking out in different directions. How would that look?

91

91

JIGSAW PUZZLE

I started the jigsaw puzzle with the four corner pieces where I thought they should be. Then I connected several edge pieces to one corner. How would that look?

92

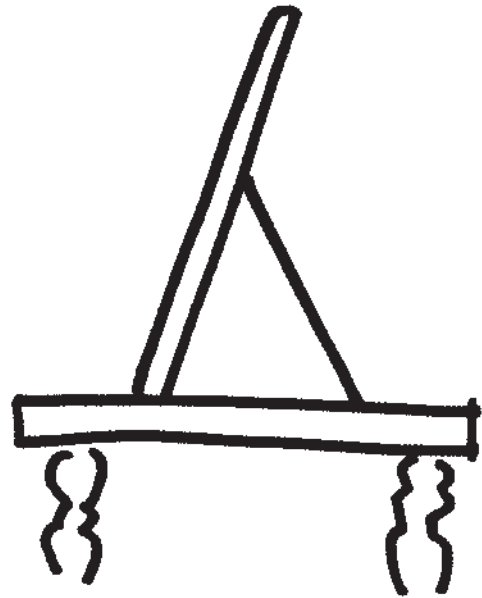

92

PHOTO

On the table, there's
a photo of my
grandmother. If you
look at it from the side,
you can see what has
been done to make the
photo stand up. How
would that look?

93

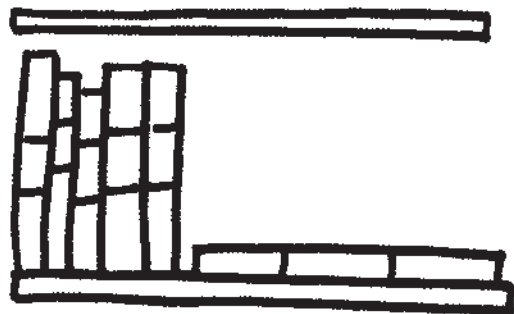

93

BOOKSHELF

There were six books
on a shelf. Five of the
books fit standing up,
but the sixth book
would only fit when
it was lying down flat.
How would that look?

94

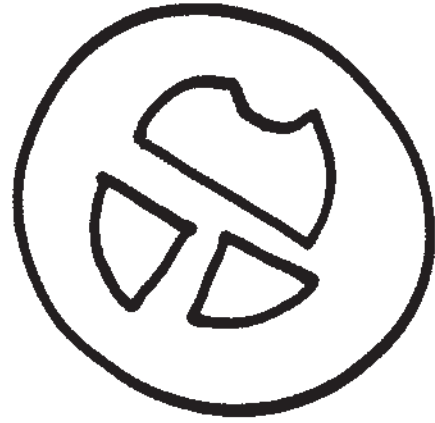

94

COOKIE CUTS

I had a big round cookie and I cut it exactly in half. Then I cut one of the halves in half. I took a little bite out of the biggest of the three pieces, and then I put all of the pieces on a round plate. How would that look?

95

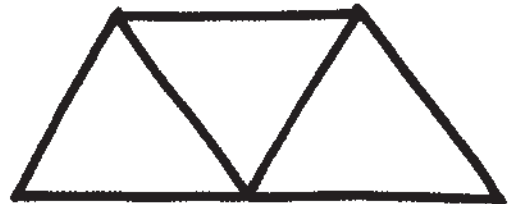

95

COZY TRIANGLES

Three triangles of the same size and shape were very cold so they huddled together as closely as possible to stay warm. One of the triangles stayed warmer than the other two. How would that look?

96

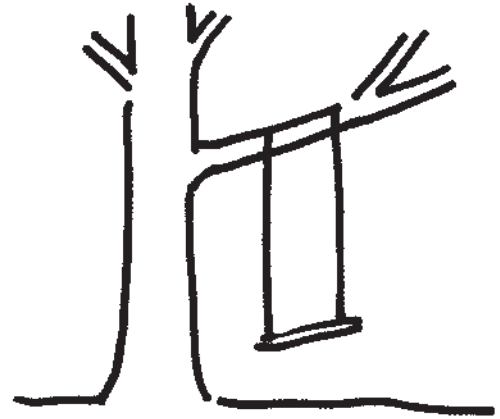

96

SWING

When my dad put up a swing that hung from a tree branch, he made a mistake. Even though the two ropes he used were exactly the same length, the seat of the swing was not level. How would that look?

97

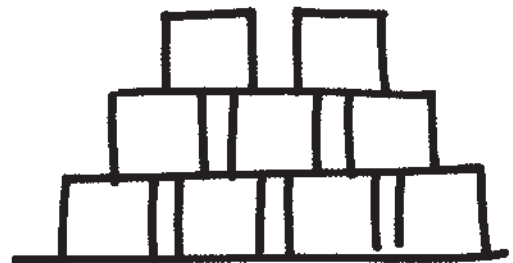

97

PYRAMID

The pyramid I was trying to make did not have a top because I had only nine blocks to work with. How would that look?

98

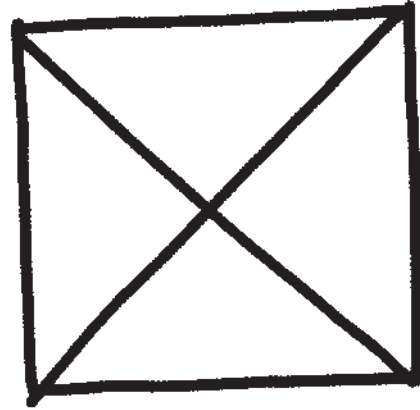

98

LINES AND TRIANGLES

Six lines decided
to get together
and make four
triangles. How
would that look?

99

99

JUICE GLASS

Our new juice glasses
are very pretty but
they are really hard
to dry. How would
one of them look?

100

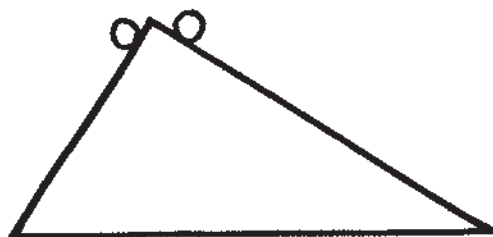

100

CIRCLE ROLL

Two circles are near the top of a triangle. One is on one side, and one is on the other side. They are both outside of the triangle, and they are touching the lines of the triangle. They are both going to roll down their side of the triangle, but one will get to the bottom much faster than the other. How would that look?

101

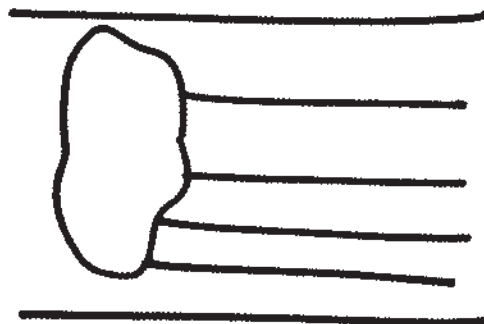

101

PUDDLE TRACKS

I was riding a bicycle and my little sister was riding a tricycle. We rode straight through a puddle and on the other side our wheels left tracks on the sidewalk. How would that look?

102

102

NECKLACE

If you had a straw
and a piece of string
and a pair of scissors,
you could make
a pretty necklace.
How would that look?

103

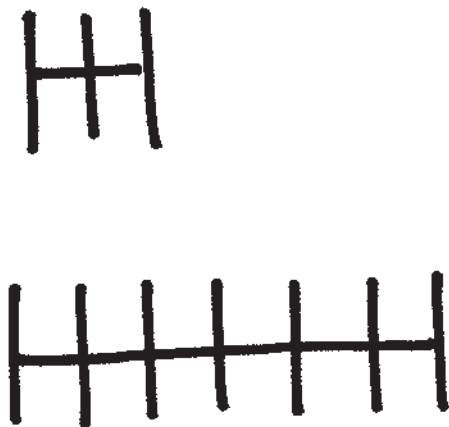

103

SIDE-BY-SIDE H's

Two capital H's, side
by side, are sharing
one up-and-down line.
Nearby, six capital
H's are sharing five
up-and-down lines.
How would that look?

104

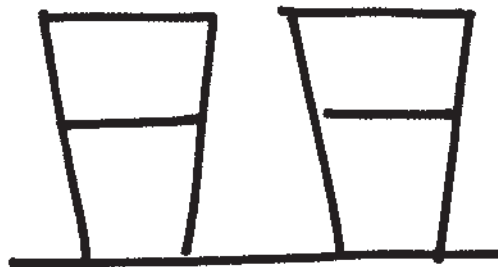

104

... And finally!

HALF EMPTY, HALF FULL

One of the glasses
is half empty and one
is half full. How would
that look?
