

# Token Multiples of 2

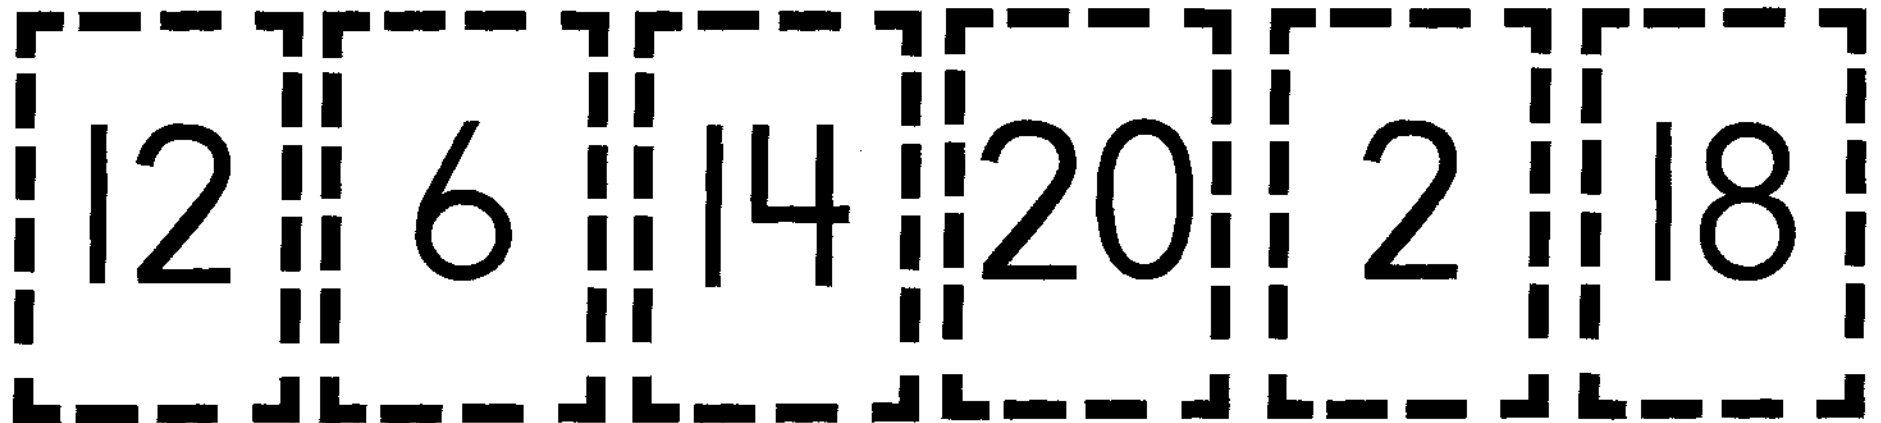

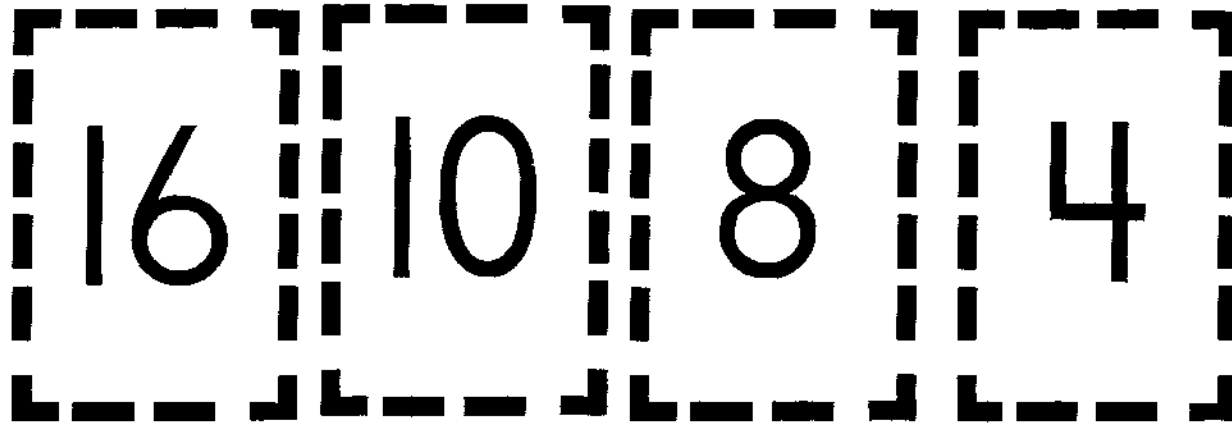

Materials: 1 deck of cards, 5 tokens per player

How to play:

Face cards= face value

Ace= 1 Jack=10 Queen = 10 King= Wild Card

First player turns over one card from deck and multiplies that number by "2". Player then finds the product on the gameboard and places one token on the product. Second player turns over next card and says multiplication sentence and covers the product with a token. If the product is already covered, the player must take that token and add it to their token bank. Play continues until one player has used all their tokens and is the winner.

# Token Multiples of 3

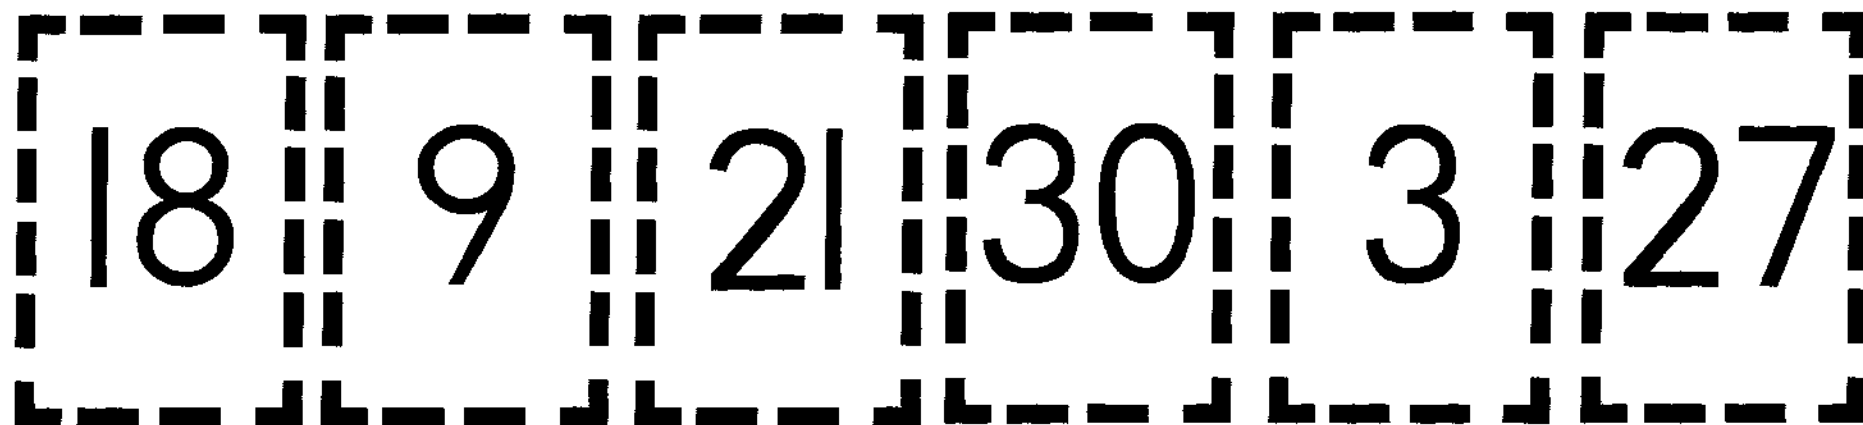

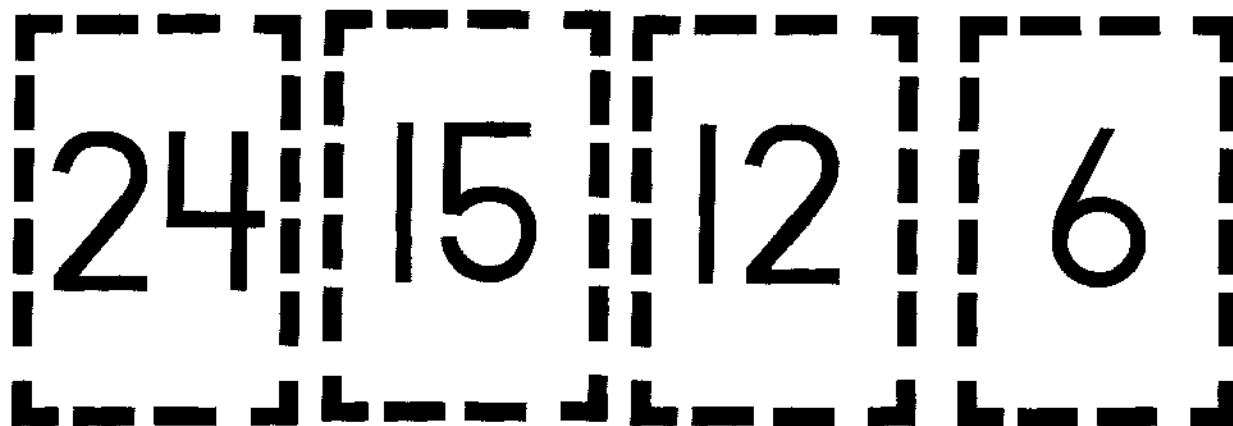

Materials: 1 deck of cards, 5 tokens per player

How to play:

Face cards= face value

Ace= 1 Jack=10 Queen = 10 King= Wild Card

First player turns over one card from deck and multiplies that number by "3". Player then finds the product on the gameboard and places one token on the product. Second player turns over next card and says multiplication sentence and covers the product with a token. If the product is already covered, the player must take that token and add it to their token bank. Play continues until one player has used all their tokens and is the winner.

# Token Multiples of 4

Materials: 1 deck of cards, 5 tokens per player

How to play:

Face cards= face value

Ace= 1 Jack=10 Queen = 10 King= Wild Card

First player turns over one card from deck and multiplies that number by "4". Player then finds the product on the gameboard and places one token on the product. Second player turns over next card and says multiplication sentence and covers the product with a token. If the product is already covered, the player must take that token and add it to their token bank. Play continues until one player has used all their tokens and is the winner.
