

In art, tone refers to the degree of lightness or darkness of an area. Tone varies from the bright white of a light source through shades of grey to the deepest black shadows.

In your “TEXT” portrait, you will be using words to describe tone. These will be written with a black pen- the **size**, **layering** and **space** around each word/ letter will suggest the tone. (See example opposite, right)

Using a black pen, choose one of your words (from the 10-20 celebrity word list you have made) to create a tonal scale using words. For example:

--	--	--	--	--

Darkest —————> to —————> Lightest
