

# U2D17 – Review

# U2D17 – Bell Ringer – 11/18

---

## Vocabulary Practice:

---

Use the pairs of words together in a sentence.

---

1) Convection and density – Convection currents move because of differences in density.

---

2) Fossil fuel and combustion – burning fossil fuels by combustion releases energy and carbon dioxide.

---

3) Temperature and Pressure – if pressure decreases, temperature decreases; they are directly related.

---

4) Greenhouse gas and Greenhouse Effect – Greenhouse gases (carbon dioxide, methane, and water vapor) absorb radiation and re-emit heat to the Earth's surface; this is the Greenhouse Effect

# Objectives

---

Content Objective: Review key details about how the atmosphere is structured and what affects our atmosphere.

Language Objective: Combine related vocabulary words into a coherent sentence.
