

Photosynthesis & Biomes Unit 2 “I CAN” Statements

Life Science Learning Target #1: *I can identify the chemical formula of cellular respiration and photosynthesis.*

Life Science Learning Target #2: *I can distinguish between photosynthesis and cellular respiration and illustrate how the two processes are connected.*

Life Science Learning Target #3: *I can identify the cellular structures primarily responsible for photosynthesis and respiration.*

Life Science Learning Target #4: *I can draw/construct via computer software and label the process of photosynthesis.*

Life Science Learning Target #5: *I can create a chart/table that compares/contrasts the reactants and products of photosynthesis and cellular respiration.*

Life Science Learning Target #6: *Identify the biotic and abiotic factors/elements of the major biomes and describe how they are connected. (Jigsaw Activity or Inspiration Concept Map)*
