## DIGITAL PHOTOGRAPHY

Name \_\_\_\_\_

Period \_\_\_\_\_

### MAJOR CAMERA PARTS AND VOCABULARY QUIZ

- 1) *Aperture*
- 2) *Lens*
- 3) *Viewfinder*
- 4) *Pentaprism*
- 5) *Shutter*
- 6) *SLR*

\_\_\_\_\_ A separate window in the camera through which you look to compose images.

\_\_\_\_\_ The lens opening formed by the iris diaphragm inside the lens. Primarily used to control exposure (along with shutter), secondary use is to control depth-of-field.

\_\_\_\_\_ A five-sided optical glass element that reflects light through 90 degrees.

\_\_\_\_\_ A type of camera with one lens which is used both for viewing and taking the picture.

\_\_\_\_\_ An optical device which transmits and refracts light.

\_\_\_\_\_ The device in-between the lens and image sensor (or film) that opens and closes to let light from the scene strike the image sensor and expose the image.
