

# Editing the E-Mail Password on your Android

Whenever you change your password on the JPS network it is also necessary to change the stored password on your Android. To do so please follow the steps below:

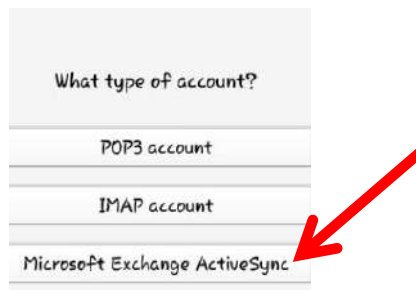

1. At the Home screen click the **Email** icon:

2. Find you e- mail **Settings** and click on it:

2. Find **+Add account** and click on it:

3. On the resulting screen click on **Account**:

4. On the following screen select the box containing your **Password** (Note the password is NOT visible for security)

5. Enter your new password and when finished click **Done**:
