Student Name:

Period:

Text Structure Review/Practice

Part A: Directions: Identify the text structure for each of the following passages. Write your answers in the BEFORE column. Underline “signal” words and clues that helped you determine each structure.

Before	Information about Chimpanzees	After
	Wild Chimpanzees are rapidly disappearing. Some people are trying to solve this problem. Otherwise, chimpanzees may one day exist only in zoos. People are trying to save the rain forests and woodlands where the chimps live from being cut down. It will take many people working together to solve this problem.	
	Chimpanzees and humans are alike in many ways. A baby chimpanzee laughs when its mother tickles it. After chimpanzees fight, they kiss and make up. When one chimpanzee comforts another, it gives it a hug or pat on the back. There are, of course, many ways that chimpanzees and humans are different. Chimpanzees are smaller and stronger than humans. An adult male chimpanzee stands three or four feet tall and weighs about 100 pounds. But a chimpanzee can lift more weight than a man who is six feet tall.
